1. Background

If you happen to be a millionair, there are plenty of private clubs to chose from. There are clubs for golf- and tennisplayers, clubs for sportcars-collectors, clubs for antique lovers.. but there is one particlar club that is even more exclusive than the most exclusive club known to mankind: The White Aces club.

The "White Aces Club" only has four (living) members, and they only meet once a month on a secret location, but it's the most wanted club amongst young and thrill-seeking millionaires. The current members are: "Ace of Spades" (Harry), "Ace of Diamons" (Bob), "Ace of Hearts" (Slayer), and the Ace of Clubs: You.

Every month a dare-devil challenge is held for the members of White Aces, and this month it's time for a crazy and dangerous "ride of death". The four members will be dropped in a car on one of the highest, most dangerous mountains in the Alps. The goal is simple: Finish first, and try to survive during the race.

Can you stay alive and finish first place in this ride of death? Race your way down this mountain at incredible speed, but watch our for the competitors who will attack you with rockets, machineguns, mines, and much more! The mountainpolice is also present and can hardly wait to open fire from their MD-500 helicopters or to smash your car into pieces with their 4WD Terrain-Grummers.

2. Controls

Action:	Default key:	Description:
Steer left:	ARROW LEFT	Your car will go to the left.
Steer right:	ARROW RIGHT	Your car will go to the right.
Speed up:	ARROW UP	Your car will go faster untill maximum speed has been reached.
Boost:	Left CTRL	Nitro-injection will cause a short but effective increase of engine power.
Brake:	ARROW DOWN	Your car will slow down. When you pass the "0", then it will automatically reverse.
Handbrake:	SPACEBAR	For both sliding and braking.
Horn:	H	Makes a sound to warn or tease other cars.
Rearmirror:	B	Rear-view mirror.
Lights on / off:	L	Toggle lights on / off to warn or tease other cars.
Camera's:	F1-F4 or C	Switch between different camera modi.

In the options/controls menu, you can define your own keys for the ingame-actions. You can also set-up other input-devices, such as a steeringwheel or gamepad.

Just switch the "input device" option (left or right arrow, or mouseclick, to change option) from keyboard to steeringwheel. If you have a Logitech or Trust steeringwheel, you will have correct predefined settings.

Unlike other steeringwheel brands, Logitech and Trust steeringwheels are well-tested and supported by Glacier. Note that there are some new options available when you select a steeringwheel: level of forcefeedback and sensitivity.

In case of any problems with your steeringwheel, please refer to the manual of your steeringwheel or the windows - configurationscreen - game input devices screen.

3. System requirements

System requirements:

Processor: 750 Mhz
Memory: 256 Mb
Videocard: 2nd generation 'hardware TnL' videocards such as:
ATI Radeon 7500
or Nvidia Geforce 2
Harddisk: 500 Mb free
OS: Win98 or WinXP
DirectX version: 9.0c

System recommended:

Processor: 1500 Mhz
Memory: 512 Mb
Videocard: 3rd or 4th generation 'hardware TnL' videocards such as:
ATI Radeon 9600 or higher
Nvidia GeforceFX5600 or higher
Harddisk: 500 Mb free
OS: WinXP
DirectX version: 9.0c

Notes on system requirements:

It's very important to have a good videocard installed in your machine. There are a lot of cheap videocards for sale, which are often have extensions like "mx" or "le". Such 'budget' cards often display visual errors in many games, or suffer from bad performance in high performance games. We have done our best effort on supporting all of these cards, but in case you still suffer from bad performance, please refer to the video-options section in this manual. Also, make sure you always update your videocard drivers once a month. New videocard drivers will decrease visual errors and increase performance for *all* DirectX games.

4. Credits

Glacier is a product of the Dutch company "Team6 game studios".

Team6 game studios is:
Ronnie Nelis, Erwin de Vries, Nico Braam, Niels Kleine

Thanks to all gamesites and customers who supported us over the years :)
