Kar Racing

Choose from 8 cars and stages around the world for the ultimate time trial challenge. The controls are simple- getting a good time isn't! Use the up cursor to increase rpm (step on the gas), use the space bar to apply brakes, and steer by using the left and right cursor keys.

AutoUpdate- Free Upgrades!

COSMI AutoUpdate Program Information

To make sure that you have the very latest and greatest updates for your COSMI applications, we are including this AutoUpdate module. AutoUpdate overwrites your COSMI program files automatically from a secure COSMI Support website area, in order to add improvements, new features and bug fixes. And this all takes place automatically, without you having to download or install them yourself!

NOTE: You must have an Internet connection enabled on your computer in order for AutoUpdate to run and gather updates to your installed files.

When you first install a COSMI application that includes the AutoUpdate feature, AutoUpdate runs automatically, as soon as the installation is completed. It will install any updates that are available for the new program, and for all the other COSMI applications on your computer that have AutoUpdate enabled.

Status messages appear in the *COSMI AutoUpdate* window as the program runs, telling you which programs are being checked for updates, whether updates have been found, and what the File Transfer progress is. Once the message "Update Complete" appears, click **Close** to close the window.

Once your application is installed, you should run AutoUpdate periodically by selecting it from the *Windows Start* menu, so that all the recent improvements for COSMI software are added to your computer!

NO INFORMATION IS COLLECTED WHEN YOU RUN AUTOUPDATE, your privacy is assured.
