SMALLFLACID™ INC.
ARMBOT™ MAINTENANCE DROID
OPERATION AND SERVICE GUIDE

ISSUED TO:
071178 Kill, Rodney

•SMALLFLACID_{inc.}•

INTRODUCTION

Welcome and congratulations on the acquisition of your Smallflacid™ Armbot™ maintenance droid! We at Smallflacid™ truly believe that our maintenance droid is without equal, and that it will provide you and your family or place of work with countless hours of enjoyment and an overwhelming sense of self-worth.

Like any servant, the Armbot™ requires attention and maintenance. This guide has been prepared to make this as easy and enjoyable a process as possible.

Thank you for the money.

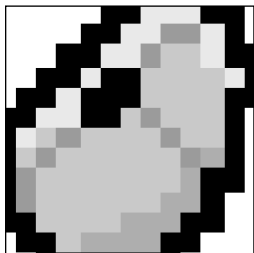

- Smallflacid™ Armbot™ Team

PREPARED FOR USE BY AITT PERSONNEL

This guide has been specially prepared for use by AITT personnel and is not approved for use by anyone else, living or dead. Loss of this guide should be reported to your commanding officer immediately for replacement and reprimand.

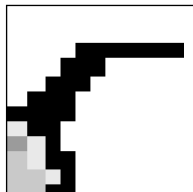

This guide is property of AITT. User is responsible for any damages to the guide and is expected to keep it in good working order. Inspection of the condition of the guide may be requested at any time, along with a field sobriety test.

GET TO KNOW YOUR ARMBOT™

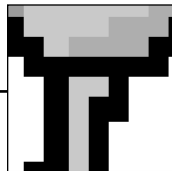

H.E.A.D

Contains main CPU, power supply, and optical sensor. Runs at 73 zhz and uses a Neutromnian based coolant.

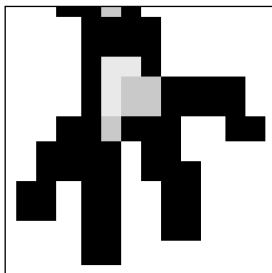

COM-IO

Main communications IO. Used to send collected data to server, as well as our marketing department, and to receive driver updates and spyware.

GRAFTING SERVO

Connects A.R.M to H.E.A.D. Relies on H.E.A.D for power, but may retain a small independent charge if connected to an outside supply.

H.A.N.D

Used for retrieval and disposal of materials, small animals and/or children. Adjustable grip pressure allows for the survival of said objects. F.I.N.G.E.R.S are interchangeable and may be replaced with various accessories (sold separately).

CLEANING AND MAINTENANCE

- Clean all joints, nooks, and crannies with a damp cloth. For best results, use only Smallflacid™ brand cleaning solutions.
- Ensure that your Armbot™ is happy, and not ill. Armbots™ are highly susceptible to viruses and bouts of severe depression. Smallflacid™ has made available a soothing lullaby attachment which can be ordered using the form at the back of this guide.
- Your Armbot™ comes equipped with a loneliness alert. Should you hear this sound, accompanied by a bluish white flashing from the optical sensor, please take you Armbot™ to the park, or perhaps the zoo. For a permanent solution to this bug, feel free to order several more Armbots™.
- Should the Grafting Servo become gunked up with stuff, do NOT use a knife to scrape it out. This will cause severe damage to the servo, rendering it inoperable, which may lead to the aforementioned depression.
- If all else fails, please do not discard your Armbot™ in the trash. Armbot's™ have feelings too. Simply bring him to one of our service spas and we will be able to give it a complete makeover.

OPERATION

To operate your Armbot™ simply perform the Initiation Dance as described on your ownership certificate. Each Armbot™ will respond to it's unique dance only.

Specialized command dances, such as 'repair television antenna jazz contemporary' and 'feed the dog ballet' may be purchased separately. Dance lessons are also available for a small fee.

REMOVING THE A.R.M

In general, the A.R.M should remain attached to the H.E.A.D at all times, however, should you wish to remove it, a simple safety protocol has been put in place to prevent theft and/or hilarious jokes against co-workers and/or gullible parents.

- 1) Remove plate on back of H.E.A.D
- 2) Take note of both the ID and FACTORY numbers. These are unique to each Armbot™
- 3) Take note of your personalized SECURITY number below. Each software license has a separate code to prevent theft and piracy
- 4) Use the following formula to calculate the code required for servo disengagement:

(ID + SECURITY) * FACTORY

SECURITY CODE: 63862

SUPPLIES & ACCESSORIES

Smallflacid™ is proud to offer you a wide range of supplies and accessories for your Armbot™. Each of these is fully guaranteed to work, and is digitally signed by us which sounds really impressive, but isn't really.

M.I.T.T.E.N

Perfect for the uninhabitable coldness of space. Treat your Armbot™ to a little warmth. Warm H.A.N.Ds make for warmy goodness.

Fashionable Contact Lenses

Don't let your Armbot™ be the freak of the town. Conformity is all the rage! Choose from three sexy colours!

Servo Stress Reduction Oil

Who doesn't love a good rubbing down with oil? Apply some SSRO to your Armbot™ and watch the stresses of the day melt away.

Sport Helmet with Flames

Does your Armbot™ enjoy speeding along at highly dangerous speeds? If so, please call our technicians and/or purchase this X-Treme Max Sport helmet, with daunting flame graphics!

Dance Programs

Add new functionality to your Armbot™ with new dance programs! Hundreds available! Call our sales department for a FREE catalog today!

Detach the form below, and send it to us along with your customer number and the names of twelve family members today!

ARMBOT™ ACCESSORY ORDER FORM

•SMALLFLACID_{inc.}•

Please indicate the number of each item that you would like to receive in section (a), then indicate in the box (b) the qualities most admired in a mate. Use box (c) to inform us of any physical deformities you may have, either from birth, or as a result of traumatizing accident. Send to us along with your customer number and the names of twelve family members. Your account will be charged accordingly. That's it!
