

## Getting Started

With your PC switched ON, insert Taxi Racer CD into your CD-ROM drive. Wait until installation window appears and follow on-screen instructions.

### Note:

If the installation window does not appear on screen after having inserted CD in the CD-ROM drive, simply double-click on the “Work station” icon on the desktop, then double-click on the TAXIRACER icon (or the CD’s icon) then on the “Setup” file to reach the installation menu.

- Keep the surface of the CD-ROM free of dust and scratches.
- Do not expose the CD-ROM to direct sunlight or leave it near a radiator or other heat source.

## **Starting the Game**

Choose “Taxi Racer” item under “Start\Program Files\Stellar Stone LLC” path in the Windows menu.

Be aware that to run game your PC should meet following minimal system requirements:

- Intel Pentium II 233 processor
- 32MB System RAM
- 100MB Free Hard Disk space
- AGP 3D accelerator card with at least 16MB Video RAM
- Mouse
- Sound Card
- Windows 98 or Windows 2000
- Microsoft DirectX version 8 installed.

Microsoft DirectX can be found on Taxi Racer CD in \DirectX directory.

## **Controller configuration**

Taxi Racer can be played with either a keyboard or driving wheel. To use driving wheel in the game, please be sure that drivers for driving wheel is installed and is up to date.

Keyboard is configured as follows:

|             |            |
|-------------|------------|
| UP ARROW    | Accelerate |
| DOWN ARROW  | Brake      |
| RIGHT ARROW | Turn right |
| LEFT ARROW  | Turn left  |
| SPACE       | Hand Brake |
| ESC         | Game Menu  |

Driving Wheel configurations:

|          |            |
|----------|------------|
| Button A | Hand Brake |
| Button B | Game Menu  |

## Playing Game

City is waiting for you! As fearless city taxi driver, you'll drive thru city filled with impatient clients who wanted to be driven to their destinations.

|             |                      |  |
|             |                      |  |
| Countdown   | 60 / 75 / 90 / 120   |  |
|             |                      |  |
| Workday     | 120 / 300 / 600      |  |
|             |                      |  |
| Difficulty  | Easy / Normal / Hard |  |
|             |                      |  |
| Traffic     | Low / Med / High     |  |
|             |                      |  |
| 32bit Color | Yes / No             |  |
|             |                      |  |
| Visibility  | Variable             |  |
|             |                      |  |
| Clouds      | None                 |  |
|             | On Cars              |  |
|             | On Cars and Houses   |  |
|             | On Everything        |  |
|             |                      |  |
| Shadows     | None                 |  |
|             | Your car             |  |
|             | All cars             |  |
|             |                      |  |
| SFX         |                      |  |
| Music       |                      |  |
|             |                      |  |
|             |                      |  |

## Troubleshooting

SHADOWS: some graphical cards show a very big shadow behind the cars. If this happens Go to the option menu and turn all shadows off.

Look after your Taxi Racer Disc. Compact Discs are robust but not invincible, so handle them with care.

Do not leave the disc near heat sources or in direct sunlight or excessive moisture.

This game requires DirectX 8 compliant AGP 3D Accelerator card.  
Game is not working with following cards:

- 3DFx Voodoo 1, 2, Banshee
- nVidia Riva 128
- Matrox G100, G200

If you play the game, turn the card off.

In the unlikely event that Taxi Racer refuses to work, contact Customer Services Department at [www.bestbuys-interactive.com](http://www.bestbuys-interactive.com)

*Ok, that's it. You're on your own. Prepare yourself. Do a good job – and Good Luck.*
