Welcome to WCW Nitro, the only game that recreates all the excitement from the hottest show in professional wrestling on your PC!

The universe surrounding World Championship Wrestling is more than just two colorful gladiators battling in the ring.

Throughout sold-out arenas across the country, complex stories play themselves out within the politics of the squared circle.

In the world of WCW Nitro, interviews and taunting help or hurt just as much as fists to the gut, piledrivers, and bodyslams.

What is the overriding force driving the Superstars of WCW Nitro? The quest for championship gold and the right to call themselves the best wrestlers in the world.

With WCW Nitro, you take control of your favorite character. Competing with the toughest and biggest stable of athletes in the history of professional wrestling, your skills drive the fate of your chosen fighter, and the world of professional wrestling.

GOOD LUCK!

INSTALLATION

Insert the WCW Nitro CD-ROM into your CD-ROM drive. WCW Nitro should launch automatically. If Autoplay is not enabled on your computer, double-click your MY COMPUTER icon, right-click your CD-ROM drive icon and select OPEN, then double-click the SETUP file.

A screen will appear with options to INSTALL, PLAY (grayed out), or EXIT. Click the INSTALL button and the Install Shield Wizard will launch.

Follow all on-screen instructions to install WCW Nitro onto your hard drive.

Note: It is not necessary to change any of the default options during installation.

After WCW Nitro is installed to your hard drive, you will be asked if you wish to install DirectX 6.0 on your computer. In order to play WCW Nitro, you must have DirectX 6.0 or higher installed. Click YES if you need to install DirectX 6.0, or NO if you have previously installed it.

After installation of DirectX 6.0, you will have the option to restart the computer. Please select YES unless you wish to perform other tasks before playing WCW Nitro.

STARTING A GAME

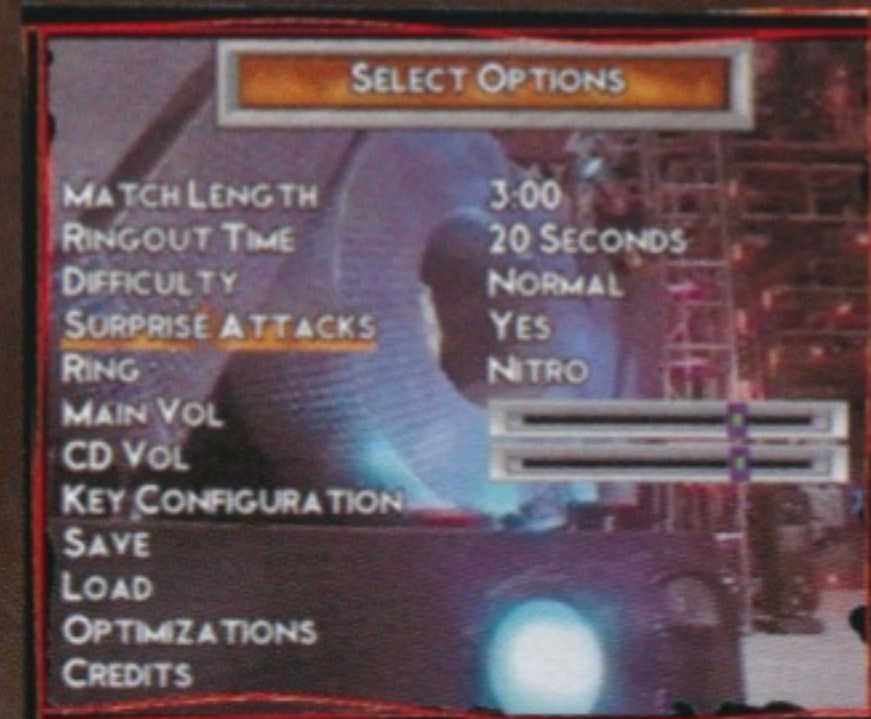

To begin a game of WCW Nitro, make sure your WCW Nitro CD-ROM is inserted into your CD-ROM drive. Double-click the MY COMPUTER icon in your My Computer window. You can also begin by clicking your START menu, moving your mouse over PROGRAMS → WCW NITRO PC → WCW NITRO PC, then clicking once.

At the WCW Nitro Title Screen, you can choose START GAME if you're ready to enter gameplay, or you can go to the OPTIONS Screen to modify your gameplay choices. Press the ARROW KEYS up or down to highlight START GAME or OPTIONS, and press the ENTER key to select.

Options Screen

Before you take to the ring, you can review your options and dictate the rules and arena within which you will face the toughest wrestlers in the world. Use the arrow keys and the ENTER key to highlight and modify your options. Press the ESC key to return to the Title Screen when you have completed modifying your options.

Match Length (default: 3:00)

Change the length of each match from 3:00, 5:00, 10:00, or Unlimited (no time limit) depending on how much punishment you think you can take!

Ringout Time (default: 20 seconds)

Action outside the ring is commonplace in professional wrestling, and in WCW Nitro. Limit the time in which players can deal damage outside the ring to 20 seconds, 40 seconds, 60 seconds, or Unlimited.

Difficulty (default: Normal)

Choose from Easy, Normal, or Hard.

Surprise Attacks (default: Yes)

Set this to Yes or No. If Surprise Attacks are turned on, call on your allies in the locker room to run ringside and help you out of a jam. But watch out, your opponents have friends, too.

Ring (default: NITRO)

Select from all of your favorite WCW venues: Nitro, NWO, WCW, Halloween Havoc, Souled Out, and more.

Main Volume

Use the left/right Arrow Keys to adjust the overall sound level.

CD Volume

Use the left/right Arrow Keys to adjust the volume of the CD Player.

Key Configuration

Press Enter to change the buttons in the Controls Configuration window. Choose from the preset configurations, or make your own. To create a custom configuration, select an action to change by pressing the Arrow Keys up/down, and pressing Enter. Then press the new key you want to use for that action.

Save

Press Enter to save your settings and championship status. Once in the Save Screen, select an UNUSED slot by pressing Up/Down, then press ENTER. Now rename this save by typing in a new word and pressing ENTER.

Load

Press Enter to load your settings and championship status. Once in the Load Screen, select a save and press Enter to load.

Optimizations

If you are experiencing slow gameplay on your machine, press Enter on Optimizations to help WCW Nitro give you the best play possible on your system. Within the Optimizations menu you will be provided with the following options:

- **Shadows** – Press Enter to turn shadows for characters on or off. Turning shadows off may help your game run smoother on your system.
- **Crowd** – Press Enter to activate or deactivate the rowdy WCW Nitro crowd. Deactivating the crowd may help your game run smoother on your system.
- **Jumbotron** – Press Enter to turn the giant TV monitor above the Nitro and PPV arenas on or off.
- **Hardware Acceleration** – Press Enter to tell the WCW Nitro software whether or not you have accelerated hardware running. If you have a Direct 3D-compatible video accelerator card, you can now use hardware acceleration. Telling WCW Nitro that you don't have accelerated hardware automatically turns off Shadows, Crowd, and Jumbotron.

Modes Of Play

Go For Championship Gold

Select **START GAME** at the Title Screen to enter the Select Mode screen. Choose from the following ways to challenge the competition:

1P Tournament

Try to become the WCW World Heavyweight Champion with the single-player tournament! Choose your wrestler, then beat 10 opponents in a row to earn your title!

1P Exhibition

Have a personal grudge against a certain WCW wrestler? Want to hone your skills against someone you consider lightweight competition? Pick your wrestler, then call out any opponent for a one-time, one night only confrontation.

2P VS

You and a second player duke it out in a one-on-one battle to the finish.

1P Exhibition Tag Team

Choose two wrestlers to form a team, and match up against two opponents of your choosing. During a

match, you control one man at a time. Get close to your tag team partner and tap your **ACTION** key to bring him into the fight.

2P VS Tag Team

You and a second player select two wrestlers each to battle in a test of tag team supremacy.

Battle Royal

Be the sole survivor in this ultimate test of stamina and fortitude! Select a wrestler to control, then try to survive against a random selection of opponents. Win by tossing all of your opponents over the top ropes after their Health Meter flashes red. Don't worry if your original wrestler gets tossed before

Modes Of Play

the final bell. Losing with the wrestler you chose will give you control of the next combatant entering the ring. Add a friend to the mix by selecting two human-controlled players.

Network

Select **Network** to play on-line against opponents using other computers. After clicking on **NETWORK**, the following options will appear:

- **IPX CONNECTION FOR DIRECT PLAY** – Play WCW Nitro over a Local Area Network (LAN) that has been set up with the IPX protocol.
- **INTERNET TCP/IP CONNECTION FOR DIRECT PLAY** This allows multiple players to connect over the Internet.
- **MODEM CONNECTION FOR DIRECT PLAY** – Two players using modems can connect directly for play.

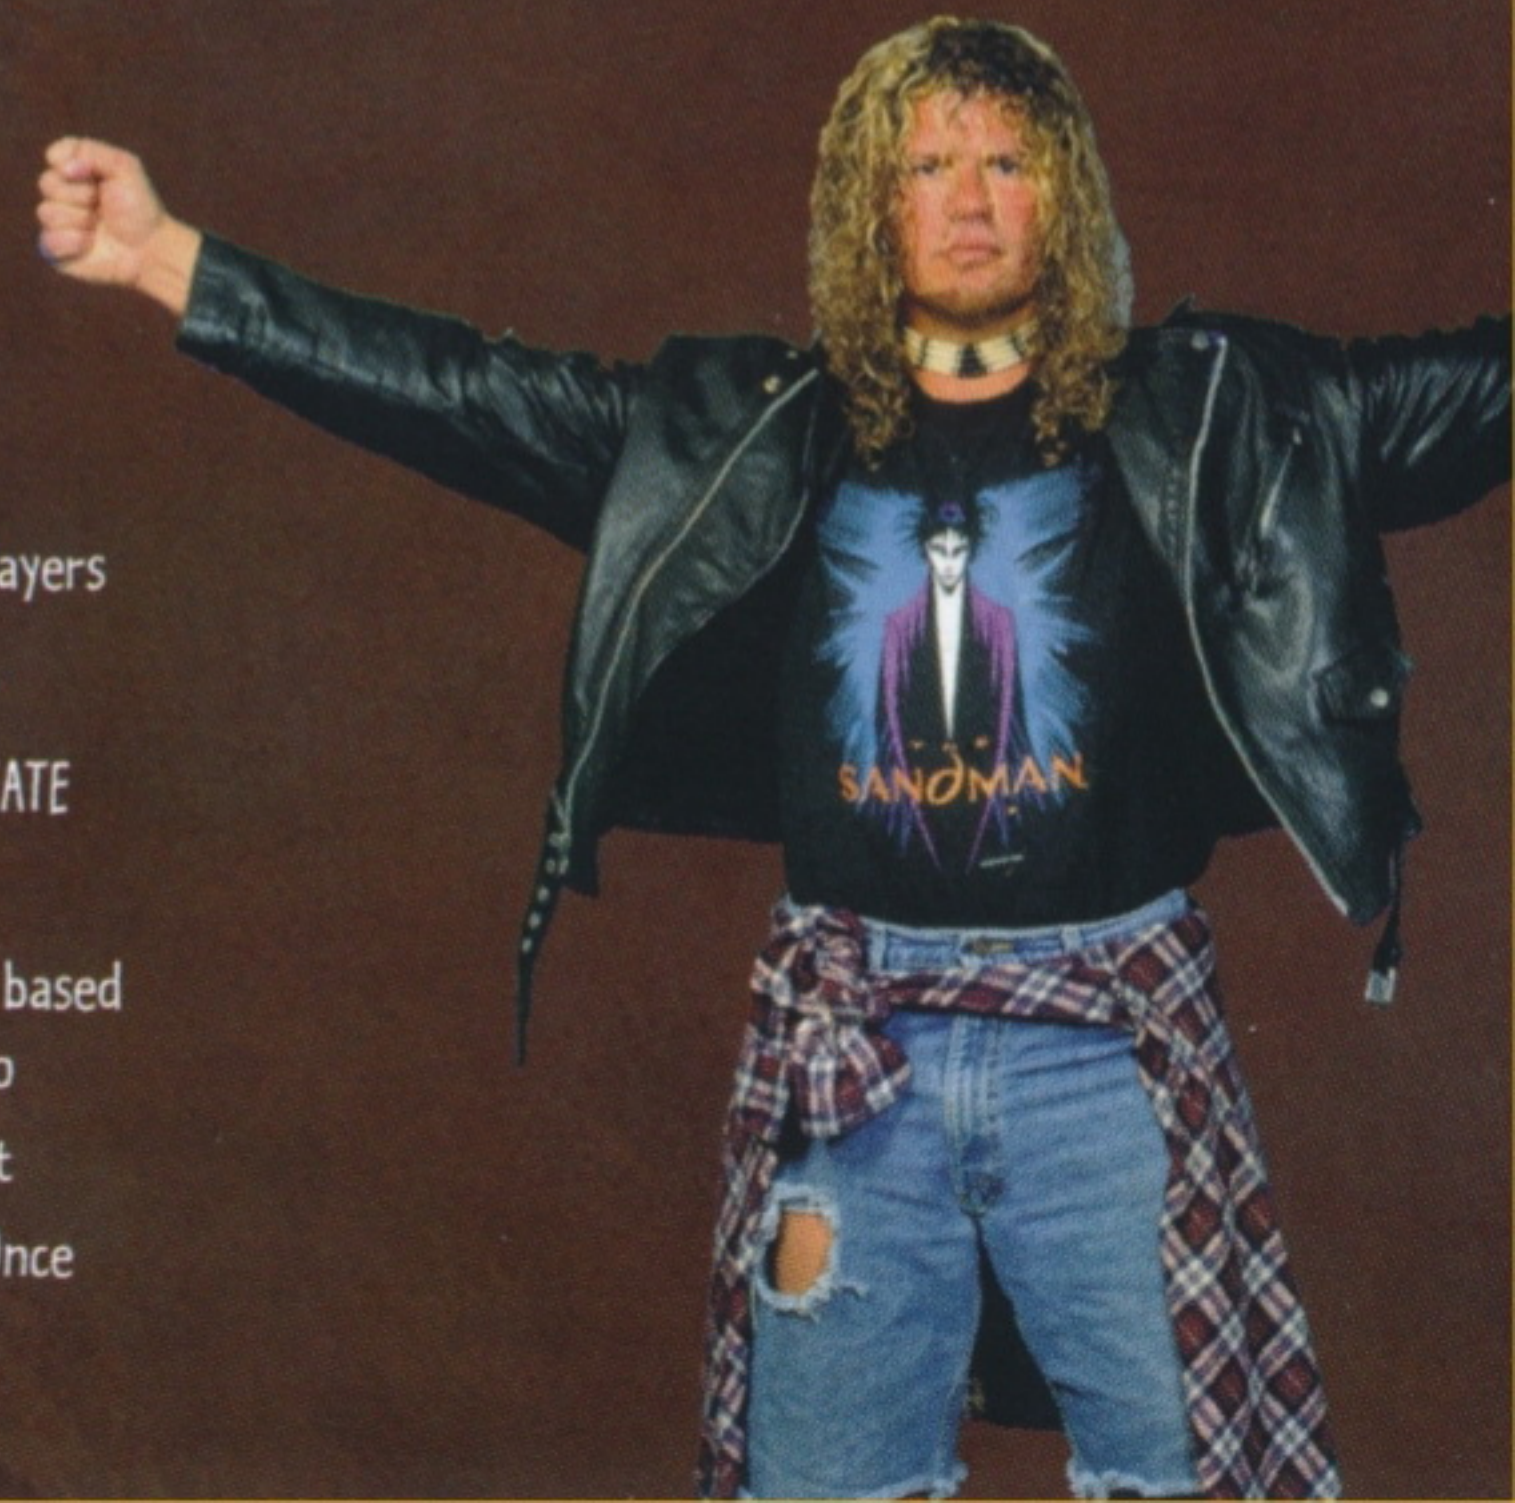

Select a **Network** option, then select either **CREATE SESSION** or **JOIN SESSION**.

- **CREATE SESSION** – Set up a multiplayer game based on your computer. It's usually a good idea to Create a session only if you have the fastest computer among all players participating. Once

you select **CREATE SESSION**, you will be asked to name your game. Do so and press **ENTER**.

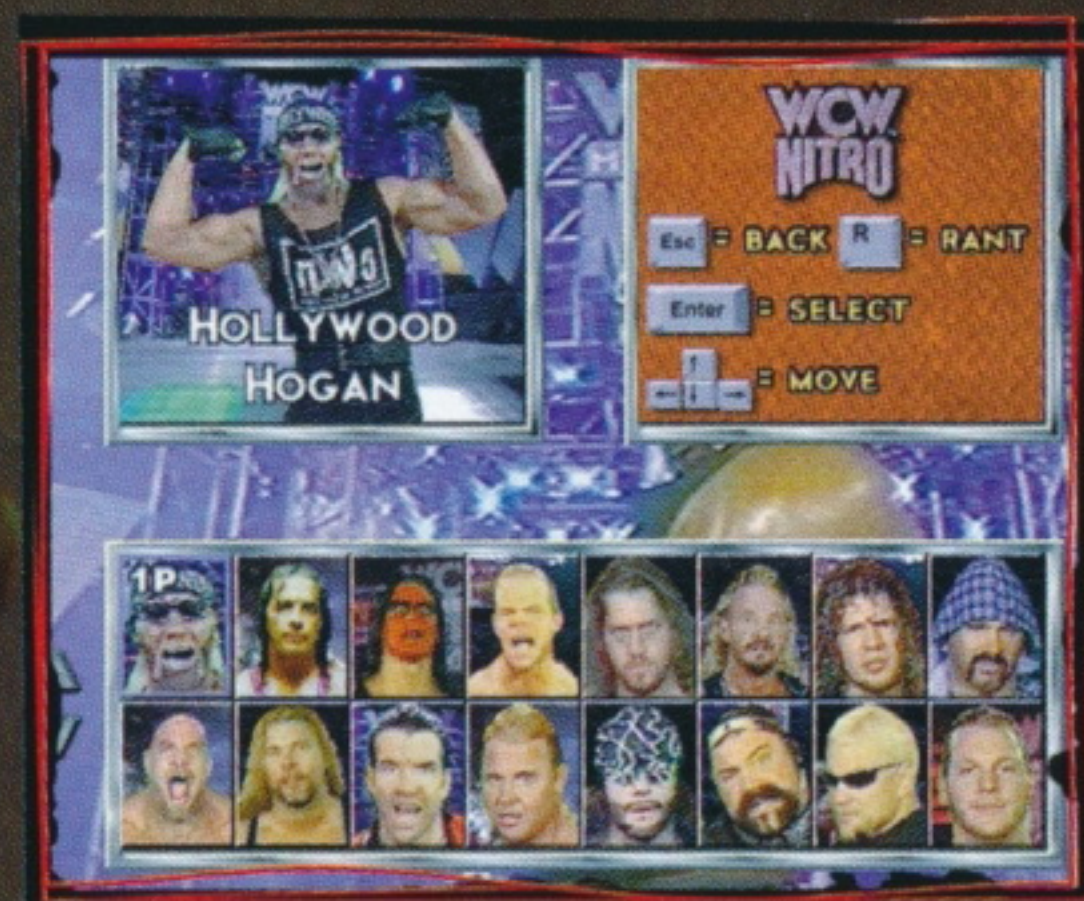

- **JOIN SESSION** – Join a multiplayer session on another computer. After clicking **JOIN SESSION**, you will see the WCW Nitro game. Select the game and click **OK**.

Once you have either begun a session or joined an existing session, the Character Select Screen will appear.

Choosing A Wrestler

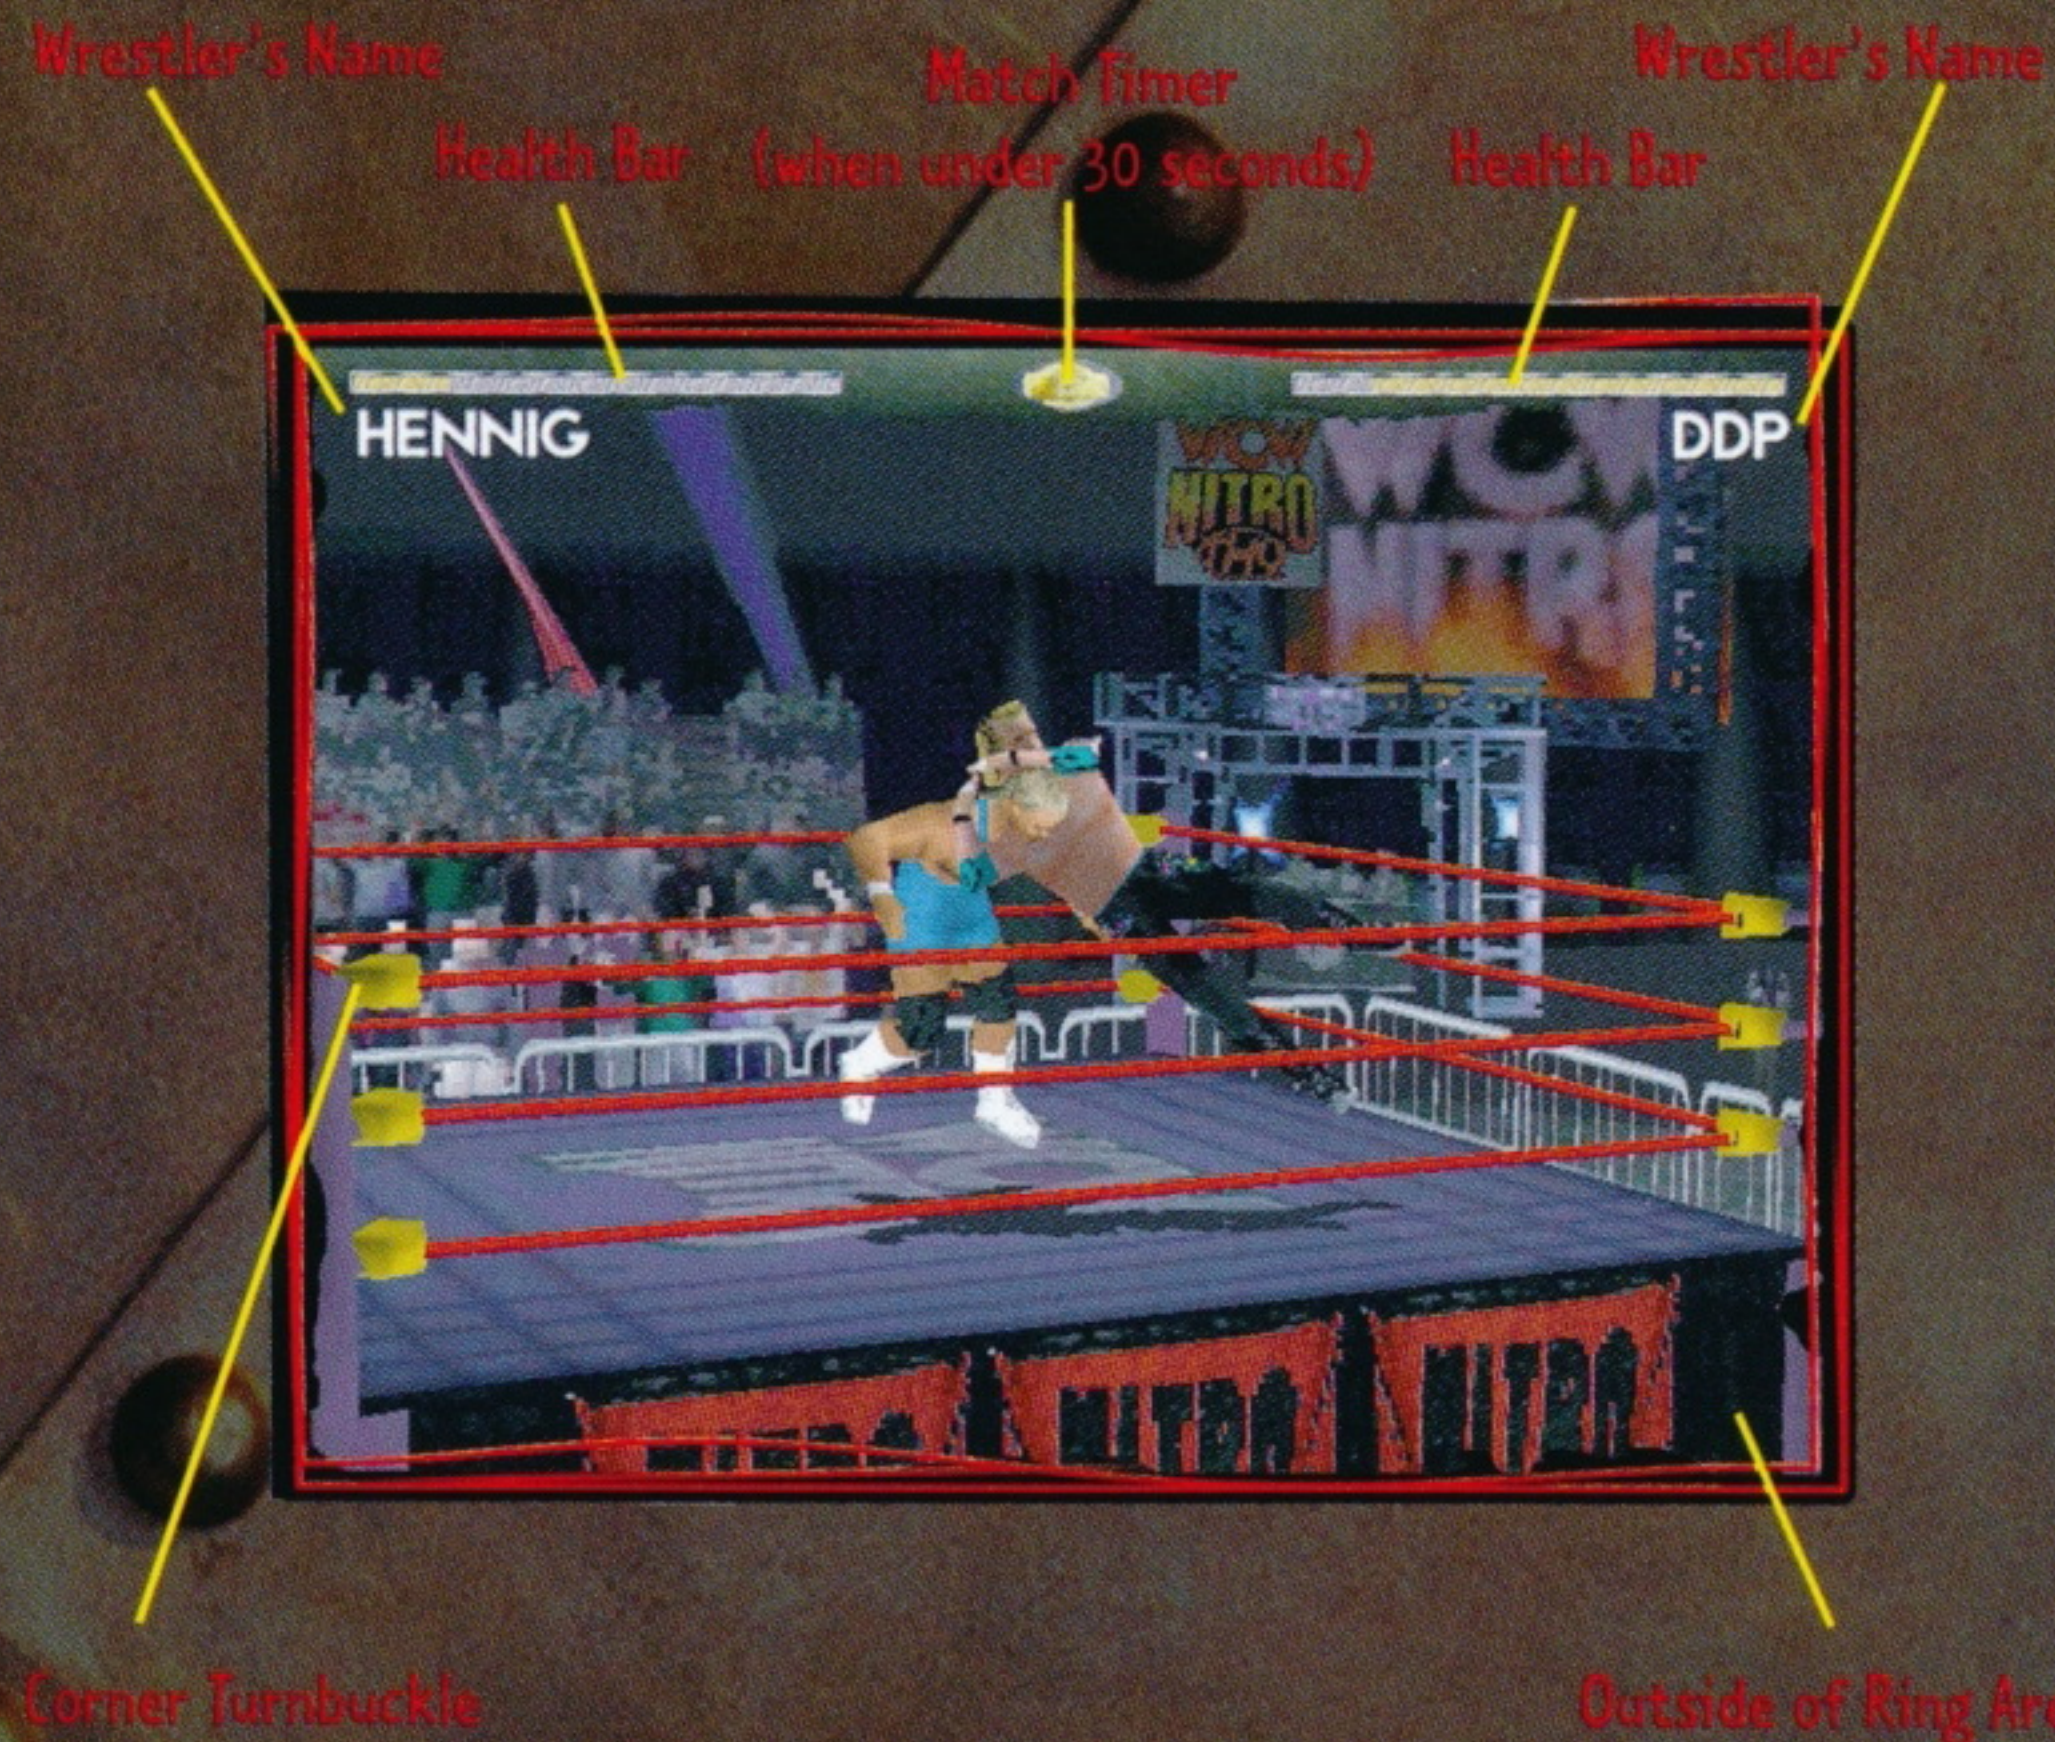

The most important decision you will make as part of WCW Nitro: Which wrestler you will choose to control in your quest to become World Champion. To help you decide, use the Arrow Keys to highlight a brawler. Press the R key to hear the wrestler's rant, his way of introducing himself to you. Then press ENTER to choose him, or use the Arrow Keys to select someone else. You can press ESC at any time to move back one screen and change your play mode.

HIDDEN WRESTLERS

Backstage at WCW Nitro are dozens of wrestlers and managers waiting to be part of the action. You may encounter them as run-in characters causing interference or as part of WCW Nitro's Battle Royal mode. Take control of these characters by winning the Tournament level. Winning tournaments using different wrestlers allows you to take control of different hidden characters. Use the SAVE mode in the Options menu to hold onto the hidden characters you've gained. When starting a game, you must load a previously saved game to reveal those hidden wrestlers you've already found. Once loaded, you can continue to find more hidden wrestlers and managers that are present in WCW Nitro.

Screen Display

Health decreases as you get hit during the match. If you can avoid being punched or thrown around for a period of time, your health will gradually increase. This goes for your opponents too, so keep punishing them! Taunting the opponent during a match pleases the crowd and helps you regain health.

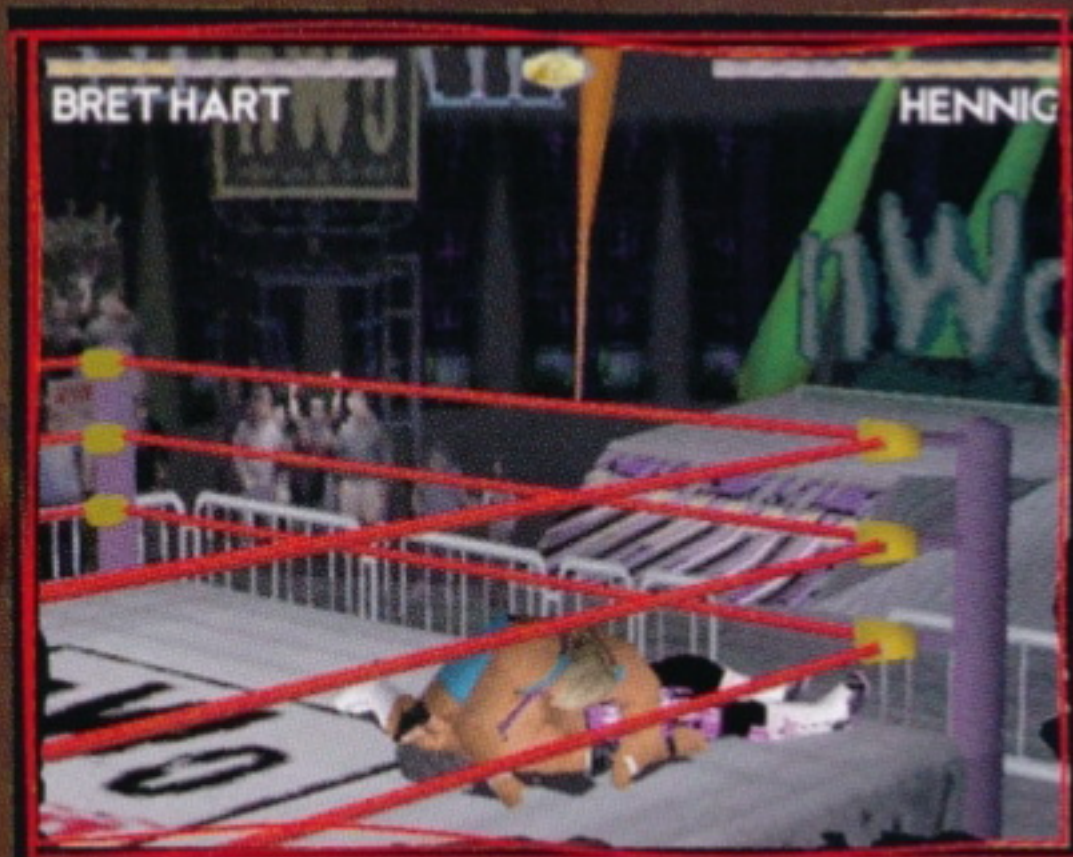

Match Length

Each wrestling match consists of one bout.

Winning

The winner can be determined in four ways:

- A match can be won by pinning your opponent (with the ACTION button) and holding him for a count of 3.
- A match can be won by default if a player or opponent stays outside of the ring for longer than the time allowed.
- If the match is timed, the bell can determine the winner. (The player with more health will be declared the winner if time expires.)
- A match can be won by submission if a player or opponent is too weak to continue after being placed in an especially painful hold.

Tournament Win

In a Tournament, the winner will be allowed to battle the next randomly chosen opponent.

Exhibition/VS Win

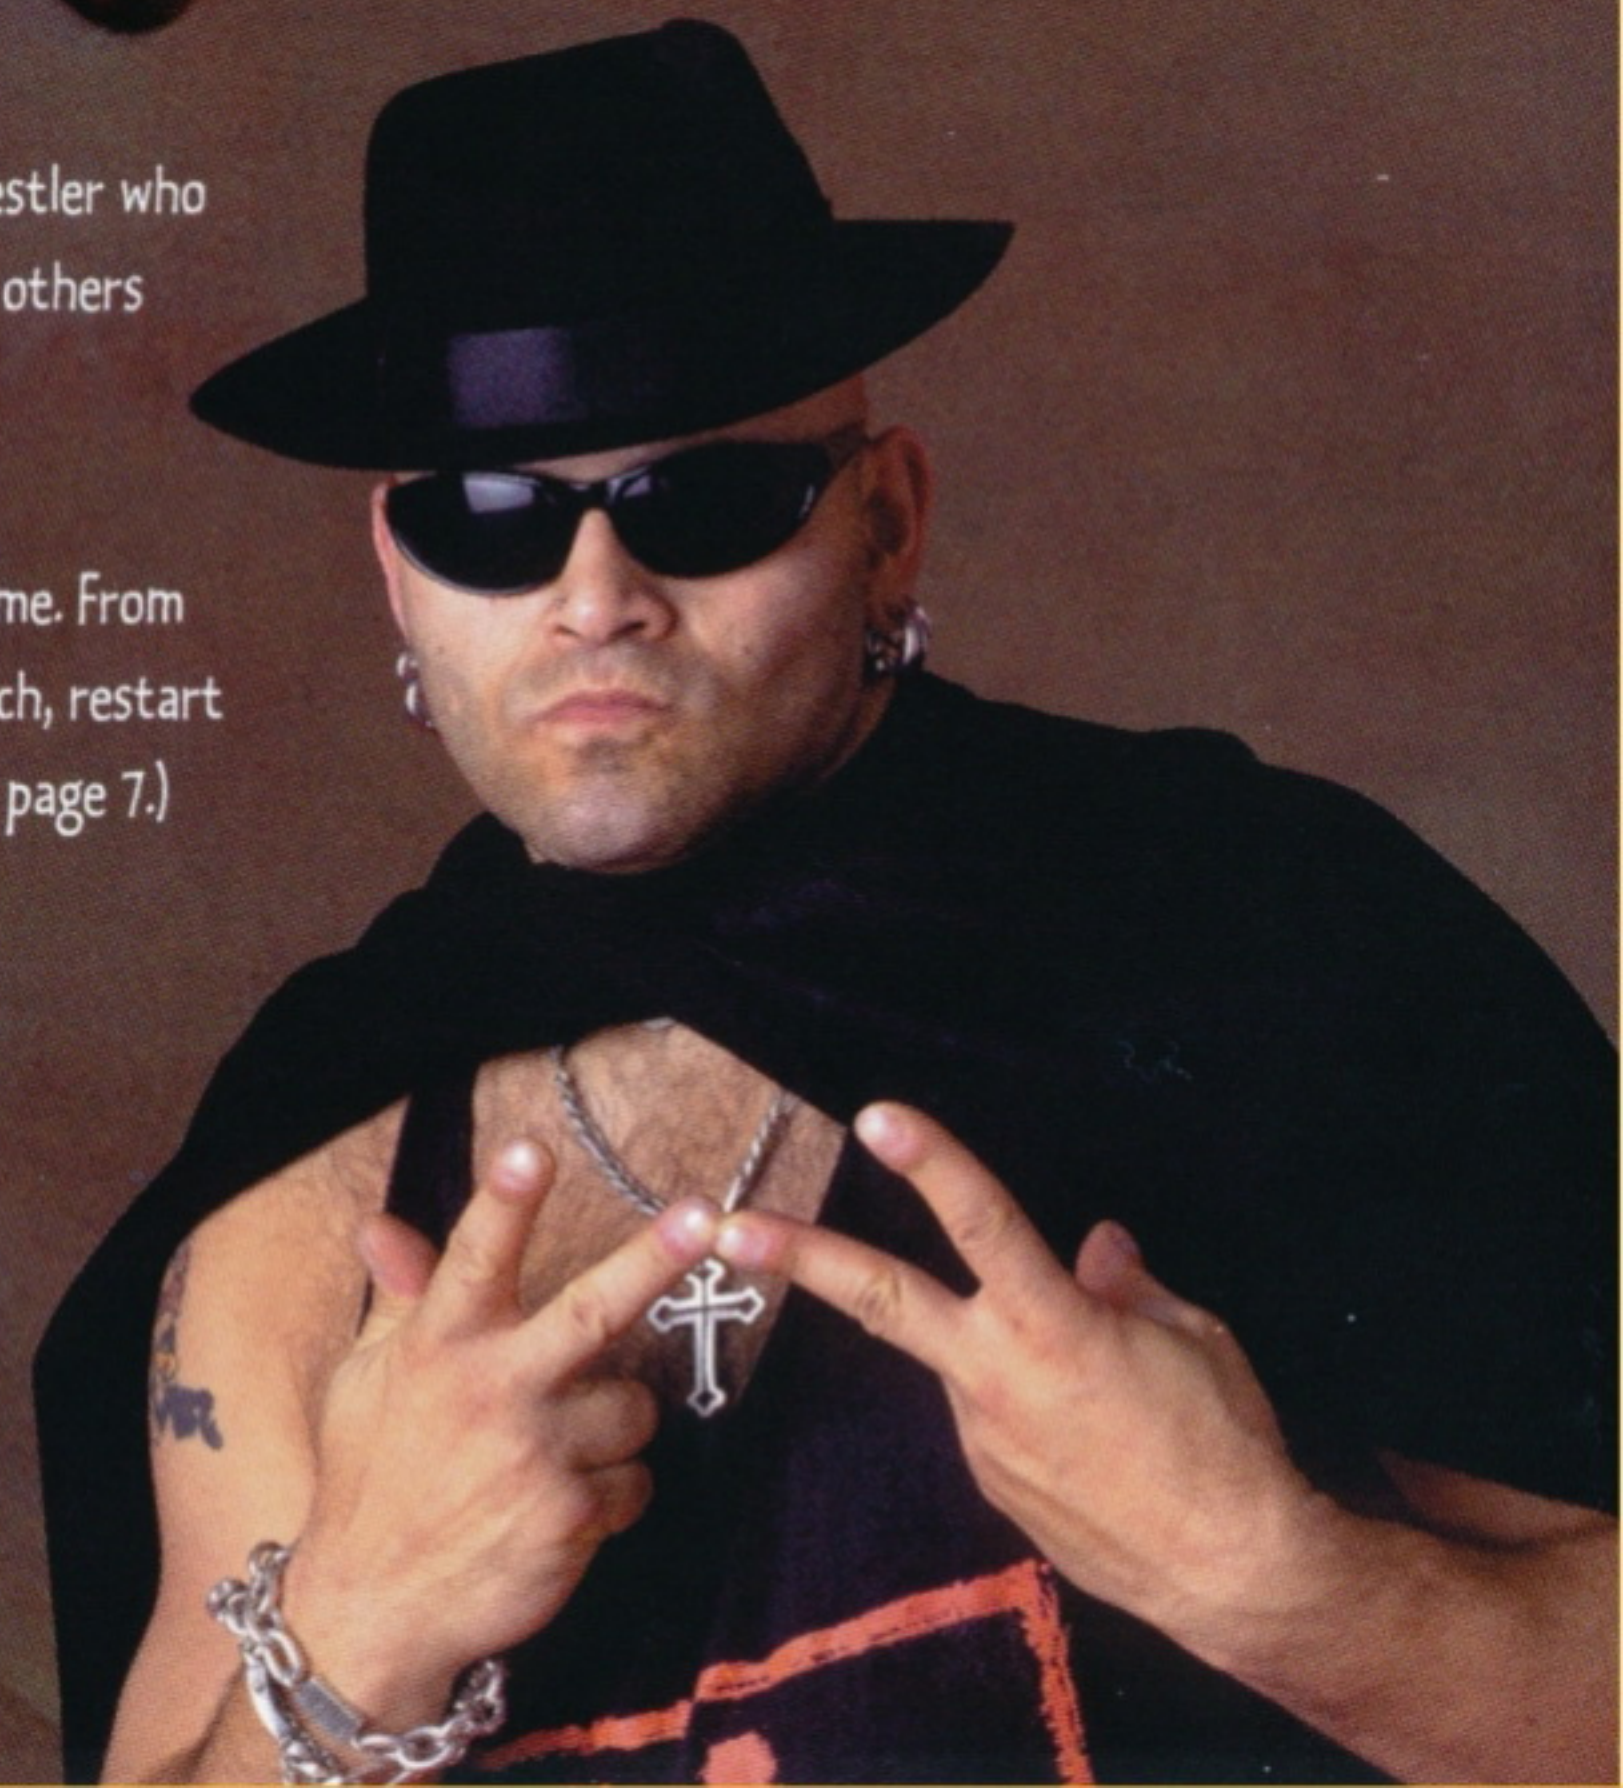

At the end of an Exhibition or VS match, the game will return to the Title Screen.

Battle Royal Win

In Battle Royal mode, the winner is the wrestler who remains as the last man standing after all others have been thrown over the top rope.

Pausing/Quitting the Match

Press ESC or P to pause the game at any time. From the Pause menu, you can continue the match, restart the match or quit to the Title Screen. (See page 7.)

The Moves

Nobody becomes a professional wrestler overnight. Practice and learn these moves to destroy the competition! All the following key combinations refer to wrestlers facing right. Reverse the left/right ARROW KEYS for wrestlers facing left. These moves can be used by all wrestlers.
