Message From HQ

MISSION ALERT! INCOMING MESSAGE FROM HQ!

The evil Dr. X is threatening to destroy the world. Only the 'Greatest Hero of Them All' can stop him.

Mission: To learn all the skills needed to stop Dr. X, and then track him down.

Status: We do not know where Dr. X is hiding, but there are some criminals helping him, perhaps they know where he is?

Dr. X

The planet is in trouble. The unimaginable has happened! Some terrible information has just been received... the mega evil Dr. X has started his plan to take over the world. The World is at his mercy!

Spies have told how Dr. X and some of his gang have several secret bases around the world. They are creating poisons, and trying to control the animals.

To add to the bad news, Dr. X has kidnapped *Action Man's* faithful dog 'Raid'. It's all part of his plan.

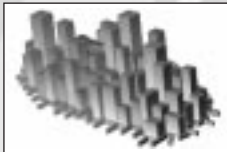

Dr. X and his band of criminals must be stopped! *Action Man* must save the world! He must save Raid! The world will be relying on *Action Man* "The Greatest Hero of Them All".

Action Man – Raid on Island X

The Islands

Urban

Dr. X is using his biker gangs to control the major cities on this Island. He has set up several laboratories and is performing evil experiments on plants and animals. He is planning to dump poisonous slime into the sewers to infect the city's water supply. He must be stopped at all costs!

Jungle

Plague Locust controls this Island. Little is known of Plague Locust. He is completely insane. Everywhere he goes destruction follows. He controls one of the main laboratories that *Action Man* must find. It is hidden away, deep in the heart of this Jungle Island.

He is using his experiments to create a toxic gas that can destroy a city in hours. It will infect all animal and plant life in its path. He plans to use horribly mutated jungle creatures to expose the world to his awful gas. If *Action Man* is to find the exact location of Dr. X, Plague Locust could be the first person to ask!

Action Man – Raid on Island X

Arctic

Professor Gangrene is almost as evil as Dr. X himself. Gangrene has hidden himself deep in the heart of the frozen wastelands of the Arctic. Within his secret command laboratory he is creating a deadly poisonous liquid. He plans to mix his deadly poison into the sea, so that it infects all the ocean life.

Island X?

It is thought that Dr. X has another secret laboratory hidden away somewhere on an unknown island. There is little known about the island or what purpose it serves. It is known simply as Island X. We already know for sure that Dr. X has kidnapped Raid, along with other animals. It is only a matter of time before he starts to experiment on them... and then eventually the rest of the world.

Action Man must travel through each area, Urban, Arctic, Jungle and finally to the mysterious Island X where he will try to confront Dr. X, shut down his laboratories and rescue Raid.
