Cypheric Hints

How to use this section

The Cypheric Hint section lets you get hints for *Corruption* without seeing the answers to questions you do not wish to know.

If you can't solve a puzzle, or if you just do not know what to do next, scan the list of questions until you find one which resembles your problem. Then, at the prompt, type:

>HINT

The computer will respond with:

Please enter your hint:

At this point you type in the letters **between** '<' and '>'. The computer will then decode your hint. If you have not typed in the correct letters the computer will respond:

Sorry, please try that one again.

A "+" sign after the answer means there's more to come. Please type in the next hint.

The first hint is usually a gentle nudge in the right direction. The last hint may be the complete solution to your problem.
