About This Manual

Welcome to the *Front Page Sports: Trophy Rivers* Installation Guide. This booklet shows you how to get the game installed and running, and provides a brief overview.

Once you start *Trophy Rivers*, you'll find several kinds of built-in help to answer any game play questions you might have:

- Click the **Preview** button on the Main Menu for a brief guided tour of the game's main features.
- Point your mouse at a game button or control for a few moments, and a brief "**Button Help**" message appears. You can turn Button Help On or Off from the Options menu.
- Press **F1** or select **Help** from the Help menu to open the on-line manual. This shows you how to get the most out of all the game features and windows.
- Select **How To** from the Main Menu or Help Menu, or right-click the Fishing Screen's Pro-Tip button to open your multi-media river fishing guidebook.

- Left-click the Fishing Screen's Pro button to see **Pro-Tip** videos based on the current conditions.
- For help with the Sierra Internet Gaming System (SIGS) with Internet games, refer to the Help menu in SIGS or the *Trophy Rivers* Web page.

Installing and Starting the Game

Windows 95

Installing the Game

1. Start Windows 95.
2. Insert the *Trophy Rivers* CD into the CD-ROM drive.
3. When the Install window appears, click on **INSTALL** and follow the on-screen instructions. (If the Install window does not appear, start Install by double-clicking **AUTORUN** on the *Trophy Rivers* CD.)

Starting the Game

1. Start Windows 95.
2. Insert the *Trophy Rivers* CD into the CD-ROM drive.
3. When the Autorun window appears, click on **RUN** to start the game. (You can also start it from the Sierra folder by double-clicking the game icon.)

Windows 3.1

Installing the Game

(Note: This will also install Microsoft Win32s and Video for Windows to your Windows System directory, if you don't have them already.)

1. If you are in Windows 3.1, exit Windows.
2. From the DOS prompt, type **SHARE**.
3. Start Windows 3.1.
4. Insert the Trophy Rivers CD into the CD-ROM drive.
5. From the File menu, select **RUN**.
6. In the RUN window, type **d:\setup** and press **[Enter]** (assuming d is your CD-ROM drive name. Enter the correct name for your CD drive).
7. Follow the on-screen instructions.

Starting the Game

1. Start Windows 3.1.
2. Insert the *Trophy Rivers* CD into the CD-ROM drive.
3. Open the Sierra Program Group.
4. Double-click on the **FPS: Trophy Rivers** icon to start the game.

Additional Setup Help

During installation, your system is tested to make sure it can run the game. If you still have problems, you'll be offered on-line setup help.

Additional information may be found in the *Trophy Rivers* **README.WRI** file. You can open this file on the CD using Windows Write, Notepad, or other word processor.

Win 95 Multi-Player Game Setup

Under Windows 95, *Trophy Rivers* supports three "remote" multiplayer game options. To use any of these options, each player must have the *Trophy Rivers* CD installed and in the CD drive, as well as the appropriate hardware:

Modem Play: Both players need to have a 14.4 or better modem configured for Windows 95 and connected to an open phone line.

Network Play: All players need to be connected to the same local area network (LAN), and on the same fileserver and subnet. Additionally, all players need to select the same network protocol (IPX or TCP/IP).

Internet Play: Each player needs an Internet browser that runs under Windows 95, and a 32-bit PPP connection to the Internet access via modem or network. Start your Internet connection before you try to start an Internet game.

Game Overview

This section briefly introduces the game's main features. See the on-line Preview and Help in the game for complete information.

Trophy Rivers brings river fishing to your computer desktop in a highly accurate simulation modeling river water physics, environmental conditions, and trout and salmon behavior. To succeed, you will need to consider the weather, season, water conditions, and many other factors that affect how fish act. What you learn playing *Trophy Rivers*, seeing the Pro video tips, and reading the "How To" multimedia river fishing reference will be equally useful on real fishing trips...and *vice versa*.

Getting Started

To start learning how to fish right away, select **Single Player**, then **Fishing Trip**, and then "**Quick Fish**." This gets you out on the river with everything set up nice and easy. See the Help menu for quick video tutorials on How To Cast, Playing Fish, and other topics.

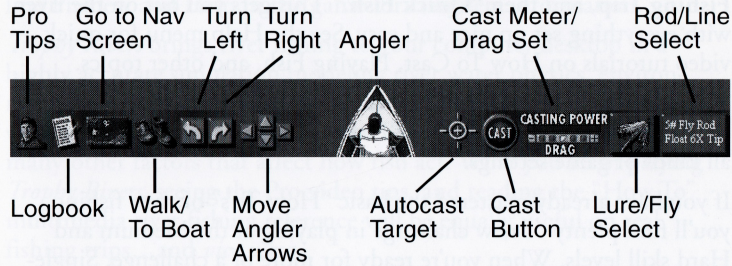

To explore different skill levels, rivers, and fishing conditions, choose the **Single Player** menu option "**Fishing Trip**." This lets you try out all kinds of game settings.

If you have already mastered the basic "How-To's" of river fishing, you'll find plenty of new challenge in playing at the Medium and Hard skill levels. When you're ready for more of a challenge, Single-Player Tournaments and Careers pit you against simulated Pro opponents and tougher conditions. You'll have to have a pretty good grasp of the game's fishing controls, fish behavior, and lure selection to be competitive here. Try the Pro Tips or How To for hints.

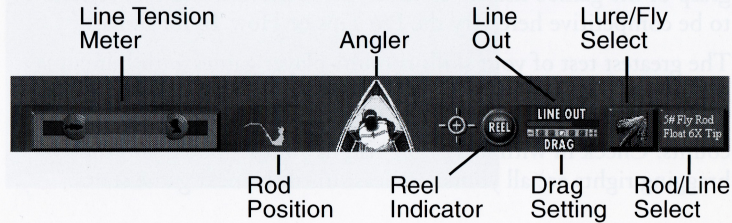

The greatest test of your skills is multi-player games with human opponents over a modem, network, or Sierra's SIGS Internet server. Tournaments are fast and frenzied contests where every second counts. Check in with lots of big fish in your logbook, and the bragging rights are all yours...at least until the next game starts.
