

MIDTOWN *MADNESS* 2

Microsoft

STARTING A QUICK RACE

Jumping right into a race is quick and easy:

1. Start *Midtown Madness 2* by double-clicking the shortcut on your desktop.
2. Select **Quick Race** from the Main Menu.
3. Choose your vehicle from the **Select Vehicle** screen.
4. Click **Go Drive** to begin the race!

For details on other racing options, including cars, camera views, and customizing controls, see online **Help**. Before you start a race, you can display **Help** by clicking the “?” button on any screen.

READY TO GET WILD?

Welcome to Midtown Madness 2, the sensible cure for the crabby commuter, and look what's new for Version 2:

- ☛ Two new highly detailed & interactive cities, London and San Francisco, modeled for maximum maneuvers and metal munching whether you're tearing through Trafalgar Square or levitating along Lombard Street.
- ☛ 10 new campy urban roadsters, ranging from a double-decker bus to the Audi TT to the zippy New Beetle Dune, with more detailed damage modeling and breakaway parts, and improved physics and handling performance.
- ☛ With the all-new Crash Course mode, you can jump in the driver's seat as an aspiring Hollywood stunt driver or as an apprentice London cabbie. Whichever course you choose, you'll build useful Madness driving skills while unlocking cool paint jobs, vehicles, and challenging exam races.
- ☛ You'll hear expanded gameplay commentary from an eclectic mix of London and San Francisco personalities.

Plus all the classic race types from the original Midtown Madness have been revved up and retooled for righteous roadway action. Cruise, Checkpoint, Blitz, and Circuit races: they're all back, and they're better than ever!

SEE THE SIGHTS OF SAN FRANCISCO

As you accelerate and slide through the City By the Bay, don't forget to enroll in the Golden Gate Stunt Driving School, where you can develop all the skills you need to own the road, whether you're grinding gears in Golden Gate Park or soaring over SOMA. Just click the Crash Course button on the main game screen!

Whenever you race, use the city map to get an edge on your opponents. To pause the game and display a full-screen map, press the **Q** key. To dismiss the map and return to the game, press the **Q** key again.

You can also use the **TAB** key (or joystick button 4) to toggle between different map views while you are driving. You can choose to display either a half-screen or smaller map (which appears in the lower right corner of your screen), or no map at all.

You can also zoom your map views in and out using the **E** key. And, if you want the map to rotate to match the direction in which you're driving, press the **F** key.

GET LOST IN LONDON TOWN!

You'll love our London—with everything from subterranean tubes to the Tower of London, we've got it all for the Anglophile.

Need a navigational nudge? The green compass arrow at the top of the screen in Checkpoint and Blitz Races always points to the nearest checkpoint, and turns yellow when that checkpoint is behind you.

While you're driving, you can also press F1 to display a handy reminder list of game controls. For all the scoop on playing the game and maximizing your performance, check out online Help. Just click the "?" button in the upper right corner of any game screen.
