This product has been rated by the Entertainment Software Rating Board. For information about the ESRB rating, or to comment about the appropriateness of the rating, please contact the ESRB at 1-800-771-3772.

Game Play

Playing OPENING WEEKEND: BEAR SEASON is straightforward—pick a weapon, pick a hunting region, and go hunting. The following sections cover the interface and game options in detail. There are four main screens in BEAR SEASON: the Main Menu, the Score Menu, the Camp Screen and the Game Window.

Main Menu

The Main Menu is where you enter the game, selecting your weapon of choice and region to hunt in. Click the mouse on a menu item while it is highlighted to select that item.

If you want to get started hunting immediately, jump to the *Your First Hunt* section starting on page 8.

Hunt

Starts a hunt with the selected region and weapon. If no region or weapon has been selected, you hunt in the default Antarctica environment, with the default weapon, a Cal.45 Handgun. For a detailed explanation of game controls and interface, see the *Game Window* section starting on page 6. For a quick introduction to the art of bear hunting, see page 8.

Choose Weapon

Brings up the Select Weapon screen, where you can choose between eight weapons. Click on a weapon to select it and a representation will appear next to the weapons list. Specifications and descriptions for each of these weapons can be found starting on page 10. When you are satisfied with your weapon selection, click on Back to return to the Main Menu.

Choose Region

Brings up the Select Region screen, where you can choose to hunt in one of four distinct regions. Each environment provides a diverse landscape, so you can pick the region that suits your taste for hunting at that particular time. Each region approximates one or two square miles of land in a unique hunting area.

Artic

Polar bears abound in this wide peninsula bound by imposing cliffs and ice cold water. Tread cautiously on these frozen slopes: a dense forest of snow covered pines gives more than ample cover to your white-coated prey. An unwary hunter can quickly become the hunted!

Russia

Imposing conifers dot the frozen wastes of this wide valley. A lack of underbrush and vast open meadows provide good visibility for hunting rogue bears.

Canada

An abundance of trees shroud the hills and meadows of this sloping mountainous region. The steep rises can limit visibility, so be cautious on this early morning search for man-hunting grizzly bears.

Oregon

The gently rising slopes of this forested area give way to stretches of empty field, giving little cover to the grizzlies known to roam the area. It is a popular hiking region, and encounters between hikers and bears are common in the fall.

Score

Brings you to the Score Menu, where you can review and compare the trophies and kills of all players. For more details, see below.

Quit

Exits the game and returns you to your Windows desktop.

Score Menu

The Score Menu keeps track of kills and accuracy for up to four Hunters. When you start a Hunt, any kills are added to the currently selected Hunter's score. If no Hunter has been selected, when you start a Hunt, you are prompted to enter a name and that name is added to the list.

To add a new hunter to the list, click on an Empty slot, type your name in the box on the right and press **Enter**. To delete a Hunter from the list, select a name, then click on the *red* Delete symbol on the right side of the screen.

To review the scores for a Hunter, click on a name in the Select Hunter box, and click on Show Score. This brings up a screen giving that

hunter's Total Kills. By clicking on the right and left arrow buttons below the Trophies box, you can scroll through the different animals that hunter has killed. A Description of each is given to the right of the bear's representation, along with the Location where that animal was shot. Its weight and the size of its head are given so you can compare the sizes of your trophies.

To clear that Hunter's score, click on the Reset Score button at the bottom of the screen.

When you are done reviewing that Hunter's score, click on Back to return to the Main Menu.

Camp Screen

You can bring up the Camp Screen at any time during play by pressing the **Esc** key. This exits your current hunt, but any bears you have killed are added to your score. From the Camp Screen you can review your score, change weapons or hunt in a new region. Hit the sack to start a new mission or traditional hunt, or End the hunting trip to return to the Main Menu.

Game Window

The Game Window shows you the world through the hunter's eyes. As you look and move around the region, the window view moves accordingly. The controls in **OPENING WEEKEND: BEAR SEASON** are very simple. The following sections cover the various actions and the keys to control those actions. As well, in the frame surrounding the view, many of the most common key commands are described and labeled. A comprehensive listing of game controls can be found in the *Game Controls Summary* on page 16. To exit the Game Window and return to the Main Menu, press **Esc** at any time.

Looking Around

You can use either the mouse or the keyboard to look around. The **PageUp** and **PageDown** keys (**9** and **3** on the numeric keypad) allow you to look up or down. The *left* and *right arrow* keys (**4** and **6** on the numeric keypad) turn you left and right. If you use the mouse, moving it away from you shifts the view up, and toward shifts the view down, while moving the mouse to either side turns you in that direction.

An aiming reticle (small yellow crosshairs) appears in the center of the screen. Adjust your aim by using these same controls. If you aim for an area out of your weapon's range, the crosshairs turn red.

Binoculars give you the ability to see further than is possible with the naked eye. Using the binoculars, you can spot animals from great distances. You can raise the binoculars to your eyes by pressing **F5**. Use the **+** and **-** keys on the keyboard to zoom in and out. Lower the binoculars by pressing **F5** again.

Movement

You can use either **E**, **D**, **W** and **R** or the *arrow* keys (**8**, **2**, **4** and **6** on the numeric keypad) allow you to move forward and backward and turn left and right. To move in the direction you are facing, press and hold **E** or the **up arrow** key. To move opposite the direction you are facing, press **D** or the **down arrow** key.

Since you move relative to the direction you are facing, you can change direction by shifting where you are looking.

Occasionally you will need to move quickly, like when avoiding a charging grizzly! When you need to run, press and hold down either the **A** or **Shift** key while moving. You can also jump, to see over rises and other obstacles, by pressing **T** or **Home** (7 on the numeric keypad).

Bear tend to have excellent hearing, and are alert to sudden movements. You can sneak around, moving slower and more quietly, by pressing and holding the **Space Bar** while moving. You can also lower your profile and improve your chances of sneaking up on a bear by pressing the **End** key (1 on the numeric keypad), which lowers you into a crouch. Hold down this key to remain crouched.

Using a Weapon

When you first enter the hunting region, your weapon is raised. You can lower your weapon at any time by pressing **F4**. You can raise the weapon at any time by pressing **F4** again.

To fire a raised weapon, press the **Ctrl** key or press the **left** mouse button. The weapon fires once for each time you press the key (unless you are using the mini-gun, in which case it continues to fire until you release the key). In the upper left corner of the Game Window is the ammo counter. This shows how much ammunition is left in your weapon and decreases with each shot. When you run out of ammunition, you must exit the hunt (hit **Esc** to return to the Main Menu) and select your weapon and region for a new hunt.

Each weapon has a different range and ammunition, see the *Weapons* section beginning on page 10 for detailed information.

The best way to control the virtual hunter is by using a combination of keyboard and mouse. Place your hand on the mouse and your other hand on the arrows on the keyboard. Use the up and down arrows to move forward and backward while using the mouse to turn and look up and down. It takes some practice to get used to this coordinated movement, but it allows you to move and aim very quickly.

If you are equipped with a long-range weapon, you may want to use a scope to improve your aim. Bear can be hard to see at greater distances. To use the scope, first raise the weapon and then press **F1** or the **Right** mouse button. Use the + and - keys to zoom the scope appropriately. To remove the scope, press **F1** again. Note that you cannot lower your weapon while looking through the scope—you must first remove the scope, and you cannot use the scope while moving.

Depending on the type of weapon you are using, it may take more than one shot to drop a bear. Take your time and choose your shots wisely. Don't be hesitant to use the scope if you are taking aim at a distant target.

Your First Hunt

This section is provided to give you a quick start in hunting with OPENING WEEKEND: BEAR SEASON. For details on options and techniques presented in this section, see the appropriate section of the manual.

Starting the Game and Entering a Hunt

1. Start OPENING WEEKEND: BEAR SEASON by clicking the appropriate icon in the 3D Hunting program group of the Windows **Start** menu.
2. From the Main Menu, select the weapon you want to use, and the region you want to hunt in.
3. Click on Hunt to enter the selected region.
4. If you have selected Russia, Canada or the US, you are prompted to go on a Traditional hunt, or to accept a Mission. The missions are as follows:
 - Russia:** Neutralize rabid bears.
 - Canada:** Tranquilize bears for relocation.
 - USA:** Rescue a trapped or injured hiker.There is no mission in the Arctic.

Looking for Signs of Bear

1. Once you are in the environment, slowly turn in a circle, looking for animals in the immediate vicinity. If you spot one, jump ahead to the *Getting a Shot* section.
2. Take note of any special instructions given when you began the hunt. Audible and written messages will alert you to special scenarios, such as a downed hiker, that require your attention. You may be issued special weapons to deal with threats from hostile bears.
3. Notice the wind direction and move into or at right angles to the wind, looking for signs of bear (usually droppings). If you find any signs, note their location and continue moving perpendicularly to the wind until you find other signs of bear. Don't forget to use **PageUp** / **PageDown** or the mouse to look up and down.
4. Once you've found a second sign of bear, look around for the last one. Imagine a line between your current location and that sign. The line indicates a possible bear path.
5. You can follow that path, looking for more signs of bear, or you can find a suitable spot *upwind* from the path to sit and wait for a bear. If you decide to wait, crouch down, put on camo, or hide behind foliage to avoid scaring the bear. Placing bait (**F2**) will draw any nearby bears to your location. Watch your back!

Getting a Shot

If you have difficulty finding a bear, you can press **M** to enable animal pointers. Arrows will appear in the sky above the locations of any bear in the region.

1. Once you spot a bear you must get close enough for your current weapon to hit it. See the **Weapons** section starting on page 10 for actual ranges.
2. Observe the foliage around the animal and determine the best place to take a shot, whether it is from a nearby ridge, a tree, or simply a few yards closer. Keep the wind direction in mind.
3. Approach the bear in spurts, occasionally stopping to watch its reaction. Be prepared for it to charge.
4. When the animal is within range, jump to the *Taking the Shot* section.

Taking the Shot

1. When the animal is within range, raise your weapon (**F4**) and optionally use the scope (**F1** or **Right-click**).
2. Position the sights or cross hairs on the bear's center of mass, generally in the chest region. Use the mouse when aiming to be more precise.
3. Fire (**Ctrl** or **Left-click**) when you have a clean shot, but be ready to quickly adjust your aim and shoot again to ensure a kill.

Remember that you can hold down the **Shift** key and quickly move backward as the bear charges you. However, skilled hunters stand in place, shoot straight, and drop the grizzly without running backward.

Being Defensive

1. As soon as you are perceived as a threat the bear will charge you. Be prepared to send a hail of lead his direction.
2. Occasionally when the bear takes a shot, he reacts to the hit by varying his approach and running sideways for a bit. Be prepared for this action and keep him in your sights.
3. If you still have the bait, quickly backpedal and drop the bait in front of you. If the bear is not sufficiently enraged he will grab the bait and retreat, offering you several free shots.
4. Continue shooting until the bear dies.

After a Kill

The other bears in the environment remain active even after you have killed one. Keep alert or you may be attacked while admiring your kill! After killing an animal, continue hunting the other bears in the region until you run out of ammo. When your ammunition is used up, or you tire of hunting, press **Esc** to bring up the Camp Screen. (See page 5 for more information.)

Becoming an Expert Hunter

The keys to becoming an expert hunter are simple: know your weapons and equipment, know your prey, develop patience and practice your aim.

Weapons

There are eight weapons to choose from in BEAR SEASON. Below are given details on the weapons, so you can judge their relative effectiveness.

.45 Cal Handgun

Damage: Light **Range:** Short

It takes a lot of nerve to hunt a bear with only a handgun. You need to be close, accurate or lucky to take down your target, preferably all three. Be ready to run for your life if your first shot doesn't kill!

9mm Rifle

Damage: High **Range:** Long

This is a high powered, bolt-action rifle with considerable range and stopping power.

30-30 Lever-Action Rifle

Damage: Medium **Range:** Medium

This gun's cartridge has less powder, and as a result, fires a bullet with less force, distance and accuracy than the 9mm, making the hunt more of a challenge.

Shotgun

Damage: High **Range:** Medium

A lightweight, low recoil gun, with a smooth bore. Shotguns are loaded with a cartridge containing a large slug for bear hunting. Although the range isn't as great, the bullet has a great deal of force behind it.

049 Side-by-side

Damage: Very High **Range:** Short

A classic shotgun, this weapon packs an awesome punch. Two, breach-loading barrels give the gun its power, but its limited range means you have to get dangerously close to a bear in order to use it.

Crossbow

Damage: High **Range:** Long

Modern crossbows easily have the range and stopping power of a common rifle. Reload time is slow in comparison, but bears are unlikely to spook at the sound, allowing you to fire at multiple targets. In addition, you are allowed to wear camouflage while bow hunting, making the stalking process easier.

Longbow

Damage: Light **Range:** Short

The ultimate test of stalking skill is to hunt with a long bow. Range is limited by the strength in your arms, forcing you to get very close to your target.

Compound Bow

Damage: Medium **Range:** Medium

Compound bows still require a great deal of strength and stealth, but their power and range have been increased by a system of pulleys.

Hunting Accessories

OPENING WEEKEND: BEAR SEASON provides several accessories for you to take on your virtual hunt. Most of these items are always with you; you do not have to select them before you begin hunting. However, you can choose not to use these items if you want to make your hunt more challenging.

Binoculars

Binoculars give you the ability to see further than possible with the naked eye. Using the binoculars, you can spot bear traces and even live bear from great distances. Press **F5** to look through your binoculars. Use the + and - keys on the keyboard to zoom in and out. You cannot move while looking through the binoculars.

Camouflage

Camouflage helps you conceal yourself in the natural terrain around you. Using camouflage, you are all but invisible to the keen eyes of the bear. However, since it is illegal to wear camouflage while hunting with a gun, camo is only available when bow hunting. If you are using a bow, press **F12** to suit up in camo.

Wind Indicator

The direction of the wind is always shown by the indicator in the upper right of the hunting window. Use this indicator to help you determine the correct angle to approach a bear. Note that if the wind is blowing toward the bear it will be able to smell you from longer distances, while having the wind blow toward you will impede the ability of the bear to smell you, even at close range.

Scent Mask

If you need to approach a bear more closely, but the wind is unfavorable, you can use this chemical which masks your scent by pressing **F3**. This usually prevents a bear from bolting, but they may still flee if you move or make a lot of noise. Keep in mind that the chemical used wears off quickly. A message at the top of the screen notifies you when it fades.

Bait

Most bears spend a significant amount of time searching for food. The concept of bait relies upon the bear's hunger, drawing him toward the tantalizing package of raw meat. Dropping the bait in a large clearing and positioning yourself upwind is a great way to attract and attack a bear. However, the bait's smell is compelling enough to attract bears in all directions, so be sure to watch your back!

Dart Gun

This medium range gun is provided for certain missions. You use it in the same way as any other weapon. It is loaded with tranquilizer darts to subdue a bear without killing it. However, while a successful shot will put a bear to sleep, the effects are not instantaneous, and the larger the bear, the longer it will take for it to be subdued.

Minigun

This short range gun is another special mission item. It fires small bullets that do little damage individually, but at a great rate. Simply hold down the fire button to shoot multiple rounds.

About the Bears

Even the most gentle of bears is an aggressive creature, prone to protecting its territory and challenging threats- such as a human wandering around within its territory. The bears you will be hunting are extremely dangerous animals, exceptionally vicious for their species. You are only sent after bears which are known to have attacked humans, and therefore must be hunted down by any means necessary. The type of bears you may encounter varies by region and fall into three categories.

Polar Bears

The large, white polar bear is an arctic species. Their preferred habitat is in the area where the northern seas meet the shoreline. Polar bears have a heavy stout body with

strong muscular legs and well-developed neck muscles. Compared to other bears, the head of a polar bear is proportionally smaller, and the necks are longer. A solitary, fearless hunter, polar bears are powerful swimmers and feed almost exclusively on meat.

Black Bears

The black bear is smaller than the brown bears and its preferred habitat includes forests with occasional open areas such as meadows. Their curved claws are highly adapted to tree climbing and all black bears are agile tree climbers. Black bears like to feed in the cool of the evening or in the early morning.

Grizzlies

The grizzly is a type of brown bear, characterized by silver-tipped (grizzled) fur as it grows older. The brown bear is a large mammal whose size and weight are extremely variable depending on the availability of food, climatic conditions, etc. Brown bears have a distinctive muscular shoulder hump and the claws on the front paws are large, strong and slightly curved. The grizzly is more highly carnivorous than most bears and preys on large mammals such as deer.

Finding Bears

At the start of each hunt, your chosen region is populated with bears of various sizes. The animals all behave realistically, stopping to eat, drink, or simply roam around the landscape. While wandering around the region, take note of where you have seen bear droppings to determine a likely path that the bear may be following. Keep in mind that there are several animals in each area—stay alert to avoid having one bear take you by surprise while you are stalking another. With their keen senses, the bears are quite capable of detecting your presence, even if you do not detect theirs. A hunter caught unaware is easily killed.

Avoiding Detection

One of the keys to successful hunting is patience. It is much easier to bulls-eye a bear from twenty feet than twenty yards. If you are using a weapon with a severely limited range, the art of moving stealthily is vital.

Bear can notice slight movements and generally perceive sudden movement as a distinct threat. Your best bet is to observe from a distance with the binoculars. Staying on high ground will help you spot distant bear and identify the best path to approach them. When moving in for the kill, try to use natural terrain to block the animal's sight until you get close enough for the kill. You can dodge among rock outcroppings, trees and bushes when closing in on your prey, but take care, it is difficult to keep track of where the animal is, and you don't want to be surprised by a grizzly!

Sudden and sharp noises will alert nearby bear to your presence. Unfortunately, the environment in **OPENING WEEKEND: BEAR SEASON** tends to compel you to move around. Move slowly, or even sneak (hold down the **Space Bar** while moving) when you know there are bear in the area.

If a bear realizes you are there, be prepared for it to attack you. In a close range battle, the odds are not in your favor, so if a bear charges you, and you aren't sure of a shot, you can try running away (hold down the **A** or **Shift** key while moving). Bears can move with remarkable speed though, if they are riled. You can try throwing down bait (**F2**) to distract it while you make your getaway.

Improving Your Accuracy

The only way to improve at anything is to practice. If you really want to work on your aim, shoot at the occasional deer, or other small targets in the environment, first with, then without a scope. When you can bulls-eye a fleeing deer at the limit of your weapon's range, without a scope, you'll know you've become an expert marksman.

Tips From Expert Hunters

- You may wish to change into camo (F12), or apply chemicals to mask your scent (F3) to avoid detection when stalking a bear. Avoiding open areas where you can be easily spotted by your prey is also recommended.
- Depending on the type of weapon you are using, it may take more than one shot to drop a bear. Take your time and choose your shots wisely. Don't be hesitant to use the scope if you are taking aim at a distant target.
- When bears are eating, they stand still, use this to your advantage.
- If you drop bait between you and the bear it usually attracts the bear to your location. Be careful however, for while the bait is more of a tempting snack, the bear will still attack you if you remain too close to the bait.
- Watching wind direction is very important. Get used to checking the indicator often, especially when approaching a bear.
- If you have difficulty finding bears, you can press M to enable bear pointers. Arrows will appear in the sky above the locations of bear.

BEAR SEASON Game Controls Summary

<u>Key Command</u>	<u>Action(s)</u>
E or Up Arrow or NumPad 8	Move Forward
D or Down Arrow or NumPad 2	Move Backward
W or Left Arrow or NumPad 4	Turn Left
R or Right Arrow or NumPad 6	Turn Right
S / F or < / >	Sidestep Left / Right
T or Home or NumPad 7	Jump
End or NumPad 1	Crouch (<i>hold to stay crouched</i>)
A or Shift + Direction	Run
Space Bar + Direction	Sneak
F4	Raise / Lower Weapon
Ctrl	Fire weapon (<i>weapon must be raised</i>)
F1	Raise / Lower Scope (<i>weapon must be raised</i>)
F5	Raise / Lower Binoculars
+ / -	Zoom Binoculars and Scope
Page Up or NumPad 9	Look Up
Page Down or NumPad 3	Look Down
F2	Drop Bait
F3	Mask Scent
F12	Wear Camouflage (<i>must be hunting with bow</i>)
M	Locate Bears
P	Power Running Mode
F6	Take Picture of Current Screen
F7	Change Display Resolution
Esc	Quit Hunt and Return to Main Menu

Mouse Command

	<u>Action(s)</u>
Move Left	Moves View / Aim Left
Move Right	Moves View / Aim Right
Move Away From You	Moves View / Aim Up
Move Toward You	Moves View / Aim Down
Left Button	Fires Weapon (<i>weapon must be raised</i>)
Right Button	Raise / Lower Scope (<i>weapon must be raised</i>)

Troubleshooting

This section provides information that should help you solve some common technical problems.

System Requirements

Please be sure your system meets the following requirements:

- Pentium 233 MHz IBM PC or compatible (266MHz Recommended)
- 32 MB of RAM (64 MB Recommended)
- Windows® 95 or 98 - NOTE: This game cannot be played on Windows® NT systems. Multitasking is not recommended when playing OPENING WEEKEND: BEAR SEASON.
- An uncompressed hard drive with 60MB free
- 4X CD-ROM drive or faster (8X Recommended)
- 16-Bit Windows compatible sound device
- 16-Bit Color and PCI Bus 3D graphics accelerator (2nd Generation PCI Bus or AGP 3D accelerator Recommended)

In addition to the basic system requirements, the game requires that DirectX 6.1 be installed to your hard drive. The option to install DirectX 6.1 appears during the game installation. At the end of installation, you are prompted to register BEAR SEASON electronically.

Copy Protection

In order to play OPENING WEEKEND: BEAR SEASON, the original game CD must be in the CD-ROM drive.

Uninstalling the Game

To uninstall the game, select that option from the Autorun menu, or choose Settings from the **Start** menu, and select Control Panel. In the Control Panel, select Add/Remove Programs, left-click on OPENING WEEKEND: BEAR SEASON, and click on the Add/Remove button. The game and all of its components are removed from your hard drive, except for your saved scores.

Sound and Video Cards

Some sound and/or video cards are not supported by Windows and DirectX. If you do not have one of the following Sound or Video cards, the game may not work.

DirectX Supported Sound Cards: *Banshee, Creative Labs, Sound Blaster, Yamaha*

DirectX Supported Video Cards: *ATI, Diamond, Matrox, NVIDIA, S3, Voodoo*

Graphics Problems

If you are having difficulties with the graphics in the game (blurred or pixelated textures, shadows, colors, etc.) first be sure that your graphics card meets the minimum system requirements, and that it is DirectX 6.1 compatible. If you meet all requirements, but the graphic glitches persist, you may not have the latest drivers for your card. These can often be downloaded directly from the manufacturer's website, or by contacting their technical support.

If your graphics and gameplay are slow, but otherwise fine, reducing the screen resolution by toggling through the choices (400x300, 512x384, 640x480, and 800x600) with the **F7** key, usually solves the problem. If you continue to have difficulty running the game satisfactorily, check to make sure your system fulfills the minimum requirements.

DirectX 6.1 Setup

This game requires DirectX 6.1 or higher. If you do not have DirectX 6.1, it can be installed or reinstalled from the CD. Installing DirectX 6.1 is an option when installing the game. It can also be installed by exploring the game CD, and opening the DirectX folder. Double click on Dxsetup.exe to start the DirectX 6.1 install. Using either the Install DirectX 6 button from the Autorun menu or Dxsetup.exe, you can install DirectX 6.1, reinstall DirectX 6.1, test your drivers certification, or reinstate your previous audio and video drivers.

DirectX Disclaimer and License

OPENING WEEKEND: BEAR SEASON utilizes Microsoft's DirectX sound and video drivers. DirectX is a programming tool created by Microsoft, and the installation of DirectX may cause video problems and system anomalies with computers using video drivers that aren't DirectX compliant. DirectX is a Microsoft product, and as such, The Learning Company cannot be responsible for changes that might occur to your computer system due to its installation. For DirectX related problems that cannot be fixed by updating to your video card's latest Windows driver set, you must contact either Microsoft or the manufacturer of your video card for further technical support or service.

Microsoft retains all intellectual property rights to DirectX. The user has been granted a limited license to use DirectX with Microsoft operating system products.

Verifying DirectX Video/Sound Card Drivers

To verify that your sound and video drivers are DirectX 6.1 certified, follow these steps: Click on the Windows Start button (usually found in the lower-left corner of your screen). Click on Run. In the open field type the command: C:\program files\directx\setup\dxinfo.exe then click on OK. Make sure all drivers say Certified next to them.

If any of your drivers are not DirectX certified you should contact the hardware manufacturer and see if they have certified DirectX 6.1 drivers.

Reinstalling Windows Video Drivers

If you find that there is a problem with your display after you have installed DirectX 6.1 you can reinstall your old video drivers by following these instructions: Click on the Windows Start button and click on Run. In the open field type the command: C:\program files\directx\setup\dxsetup.exe then click on OK. Click on the Restore Display Drivers button. This may require that you have the disk containing your original drivers.

Contacting Technical Support

If you are having problems, please consult the rest of this Troubleshooting section before contacting The Learning Company Technical Support. We've put many of the solutions to the most common problems in this area. If you are sure that you meet the OPENING WEEKEND: BEAR SEASON system requirements and the game still does not run, please make certain that you are using the latest drivers for your system.

The Learning Company technical support department is available to assist you with any issues regarding the product you purchased. Technical support can be reached via e-mail, U.S. mail, fax, or phone. The technical staff supports the entire family line of products from The Learning Company.

When contacting technical support, please provide as much information as you can about your computer system and the problem you are experiencing. The following information is necessary to providing you with technical assistance:

- Your first and last name.
- Phone number, fax number, mailing address and e-mail address.
- Name of the product, version, platform and format. **Example:** OPENING WEEKEND: BEAR SEASON/version 1.0/Windows 95/98/CD-ROM
- A brief description of your problem.
- Type of computer including name brand. (Mac or PC) If you cannot find the name of your computer say IBM PC Clone. **Example:** Dell PC Pentium 200 MHz
- Amount of memory. **Example:** 64 MB of RAM
- Size of hard disk. **Example:** 12 GB hard disk
- Type of video card. **Example:** ATI Matrox Milenia 8 MB video card
- Type of CD-ROM Drive. **Example:** 4x Panasonic CD drive
- Type of DVD-ROM. **Example:** 2nd generation Phillips DVD-ROM drive
- Type of Sound Card. **Example:** Creative Labs 16 bit sound card
- If using a network please mention the type of network being used.
- Modem type and speed. **Example:** US Robotics 56K Flex internal modem

- Version of Windows or Macintosh operating system.
- If you are having a printing problem specify the name, make, and model of the printer you are using. **Example:** HP Deskjet 870 CSI

Check our Web site, <http://www.learningco.com>, for answers to frequently asked questions and other technical support information. Go to the Support section to get FAQs, downloads, patches, and other useful files.

Technical Support Call Center

24 Hour Automated 800 Support: (800) 409-1497

This service allows our customers to find commonly asked questions to products and their answers free of charge.

24 Hour Technical Support Fax Line: (319) 395-9600

Main Technical Support Number: (319) 247-3333

Technical support representatives are available between 9:00AM and 9:00PM Central Standard time, Monday through Friday (excluding holidays). Please be at your computer when you call.

Online Technical Support

Technical Support E-mail Address: Help@tlcsupport.com

Online Technical Library: www.learningco.com/support

If the game about which you are inquiring has been out for more than 90 days, you'll want to visit the Web site to be sure you are running the latest version of the game before contacting Technical Support.

Telephone (319) 247-3333 between 9:00am and 9:00pm Central Standard time, Monday through Friday, holidays excluded, Tech Support Fax: (319) 395-9600 Attn: Technical Support, calling our automated services at (800) 409- 1497, Filling out our online support form at:
http://store.learningco.com/dev/support_form.asp (or the game's web page, which is listed in the manual), Email: Help@tlcsupport.com (please list the game's name as the message's subject), You can also write to us at The Learning Company, Attn: Technical Support, 1700 Progress Drive, PO Box 100, Hiawatha, IA 52233-0100 USA (include a self-addressed, stamped envelope for reply).

THE LEARNING COMPANY LIMITED WARRANTY

The Learning Company and its parent company and all affiliates warrants that the diskette(s) on which the enclosed program is recorded will be free from defects in materials and workmanship for a period of 90 days from the date of purchase. If within 90 days of purchase the media prove defective in any way, you may return the media to The Learning Company, Attn: Returns, 1700 Progress Drive, PO Box 100, Hiawatha, IA 52233-0100 USA. Please include a copy of your sales receipt, packaging slip or invoice, along with a brief note of explanation as to why you are returning your program.

THE LEARNING COMPANY MAKES NO WARRANTIES, EITHER EXPRESS OR IMPLIED, WITH RESPECT TO THE SOFTWARE PROGRAM RECORDED ON THE CD OR DISKETTE OR THE GAME DESCRIBED IN THIS RULE BOOK, THEIR QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. THE PROGRAM AND GAME ARE SOLD "AS IS." THE ENTIRE RISK AS TO THEIR QUALITY AND PERFORMANCE IS WITH THE BUYER. IN NO EVENT WILL THE LEARNING COMPANY BE LIABLE FOR DIRECT, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM ANY DEFECT IN THE PROGRAM OR GAME, OR FOR LOST DATA RESULTING IN ANY WAY FROM USE OF THE PROGRAM OR GAME, IN ALL CASES EVEN IF THE LEARNING COMPANY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF IMPLIED WARRANTIES OR LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.) THE LEARNING COMPANY FURTHER EXCLUDES AND DISCLAIMS, AND THE LICENSEE HEREBY WAIVES, ANY AND ALL PROVISIONS EITHER PRESENTLY EXISTING OR AS AMENDED IN THAT CERTAIN INTERNATIONAL SALE OF GOODS CONVENTION OF JANUARY 1, 1988, INCLUDING BUT NOT LIMITED TO ANY AND ALL WARRANTIES, WHETHER EXPRESS OR IMPLIED, THEREIN.

The enclosed software program and this manual are copyrighted. All rights are reserved. This manual may not be copied, photographed, reproduced, or translated or reduced to any electrical medium or machine-readable form, in whole or in part, without prior written consent from The Learning Company. The program accompanying this manual may be copied, by the original purchaser only, as necessary for use on the computer for which it was purchased. Any persons reproducing any portion of this book for any reason, in any media, shall be guilty of copyright violation and subject to the appropriate civil or criminal action at the discretion of the copyright.
