Introduction

When Shrek married Fiona, the last thing he had in mind was becoming the next King. But when Shrek's father-in-law, King Harold, suddenly dies, that is exactly what he faces. With the help of his trusted companions, Donkey and Puss in Boots, Shrek must find a suitable King for Far Far Away or be stuck with the job himself. And the most "promising" candidate, Fiona's cousin Artie—an underachieving medieval high school slacker — proves to be more of a challenge than they bargained for.

Game Modes

Story

Join our good friends from Far Far Away as they follow Shrek on his quest to find Fiona's cousin, Arthur, and convince him to take his rightful place on the throne.

Multiplayer

Here's the chance for you and your friends to compete against each other on the field of battle! Armed with catapults and giant crossbows, be the first to destroy your opponent's fortress and win!

Castle Attack – Use the catapult to knock down the castle walls. Try knocking out the balloons before they float away!

Minigames

Enjoy special mini-games with Shrek and friends, arcade-style. Play by yourself or with a friend. Can you score high enough to get a gold medal in all the games?

Catacombs Leap – One by one, get Shrek and his friends across to the gates at the other side as fast as you can. Whatever you do, don't look down! **A button + A button** make you double-jump, which you can use to get across the catacombs more quickly. If you fall, you will lose a life. Every 500 points earns you an extra life. Collect the stars and earn 100 points each!

Frog Herder – Chase all the frogs into the nearby ponds before the clock runs out. Keep an eye out for exploding obstacles! In 2 Player, you need to get the frogs to the pond with your character on it, to the left and right of the field. Power-ups can make the frogs swarm to you or reverse your opponent's controls. They can also change your speed.

Ships Ahoy – Use the cannon to protect the treasure from the incoming pirates. Don't let them near the beach! White ships are 100 points, red ships are 250 points and black ships are 600 points. The golden bonus ship is worth 1,000 points!

Shooting Gallery – Fling tomatoes at the moving enemy targets...but watch out for Donkey! Hitting the clock or hitting two targets at once will give you a 5-second time bonus. Hitting Donkey will give you a 10-second penalty.

Shrekleboard – Shoot pucks into the scoring zones. Beat Hook's score to advance to the next round! You get an extra puck when you get 1,000 and 2,000 points.

Safety Information

About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information. The Xbox Instruction Manual contains important health and safety information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of gameplay may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.
