INTRODUCTION

Get up lazybones! It's Mom. I'm glad that you're going to be around the house to help me out, and make no mistake, I will expect you to help out. I'm not here to pick up after you. Anyway, I don't want to be alone at a time like this. I can't believe Malcolm is treating me like this, that louse! And after I gave him the best years of my life! Well, all of my hopes are on you now. I know you'll make me proud—or else. So quit your loafing around and get up and find a good job. And don't just settle after you take a job, I want to see you working hard and moving up in the world. After you make it big, you had better remember who helped you get your start.

Now I know you think I'm a nag, but here are a few things that you should keep in mind:

- First and foremost, take care of yourself. You won't succeed if you neglect your needs (> *Motives* p. 8). And, yes, that means bathing more than once a week! No one likes a grump and that includes your boss, so be sure to go to work in a good mood if you want to get promoted.
- Certain jobs are more accessible from certain locations. When you get promoted, think about moving to a new home that's on a direct bus line for your new position. You know how bosses hate employees who are always late!
- I want you to be successful, but you have to get some enjoyment out of life, too, you know! Keep your goals in mind and work hard, but find a balance between work and play. There is a fine line between having a strong work ethic and being a workaholic bore.
- It's okay to change career paths, but remember when you start on a new career path, you have to start at the bottom rung of that career ladder, which means more hard work before your dear ol' mom will have any respect for you again.
- And lastly, remember to clean up after yourself and eat right!

CAREERS AND SKILLS

There are seven career paths, plus five bonus, unlockable careers (for Free Play mode only) in *The Sims Bustin' Out*. Different careers require different skills. Be sure to choose a career which also suits your Sim's personality.

MOVIE STAR

The path of a movie star starts at the Mall. You Sim hams it up to encourage shoppers to spend, spend, spend. Outgoing Sims are good candidates for this career path and must hone their charisma and creativity skills among others if they want to achieve real fame.

Sims start out as a lowly Lab Cleaner on this career path. If they get really good at keeping the rodent cages clean and sterilizing test tubes they just might need to think about improving their mechanical skills to be noticed for a promotion.

MAD SCIENTIST

GANGSTER

To successfully work their way up in a life of crime from vandal to top gangster, Sims must be in good shape and have a flair for creativity. What, you thought just anyone could lie, cheat, and steal?

FASHION VICTIM

Scaling the heights of fashion requires that your Sim look fabulous all the time and learn to creatively charm the who's who of the fashion world. Keep your Sim fit and active if they want to advance in this career where looks are everything.

PARAMILITARY

If your Sim has a yearning to keep peace throughout the Sim world, they might consider taking on a life in the military. Beginning as a latrine cleaner, Sims on this path emphasize logic skills and keep their well-toned bodies in fighting shape.

COUNTER CULTURE

Some Sims are lovers, not fighters. If your

Sim falls into that category, a life on the counterculture career path might be in their cards. Sims on this path keep their bodies fit and pure and work on charisma so that they can enchant other Sims with their alternative lifestyle.

JOCK

These die-hard sports fans give it their all when they start off their careers as the mascot of their favorite teams. Achieving the strength and stamina of a prime athlete helps them advance in their chosen career. Charisma skills ensure that they're well-spoken on the highlight reels at 11:00.

BONUS CAREERS

There are five bonus careers that you can access in Free Play mode. Bust out as Rock Star, Slacker, Artist, or Computer Geek, or make your millions as a sneaky Swindler.

- These careers are available in Free Play mode only.

SKILLS

While your Sim may have a very engaging personality and all the friends in the world, without proper skills they're destined to a low-paying job with little or no respect. A little education goes a long way to helping your Sim get ahead.

Cooking

There's nothing like a good cook. Your Sim can improve their culinary skills by studying cooking (from a book in a bookcase) or by serving up drinks from the SlushRush Portable Bar.

Mech

Sims with high mech (mechanical) skills are handy to have around. They can fix broken appliances and keep the whole house running smoothly. Grab a book to study mech or amp up your fun by using the Invention Workbench.

Creative

Let your Sim's imagination run wild. Creative Sims love to paint, play musical instruments, or even make pottery.

Body

Get your Sim off the couch and into shape by using a treadmill, weight bench, or climbing wall.

Logic

Elementary, my dear. Sims who play a lot of chess or gaze at the stars through a telescope develop sharp logic skills.

Charisma

Sims with high charisma have more than a way with words, they can charm their way into—or out of—anything. Sims gain charisma by practicing speaking in front of mirrors, or by using the NostalgicCo Microphone.

SAVING AND LOADING

Save your Sim's painstaking progress in life on a memory card.

- The game auto-saves whenever you move to or visit another location.

Note: Never insert or remove a memory card when loading or saving files.
